

ZenithPro Copy Arsenal v1.0

Installation Guide

What You're Installing

The ZenithPro Copy Arsenal is a complete AI-powered copywriting system that gives you:

- **4 World-Class Copywriting Masters** - Clayton Makepeace, John Carlton, David Deutsch, and Evaldo Albuquerque, each with their complete methodology encoded into AI skills
- **51 Specialized Skills** - From headlines to closes, emails to VSLs, each element of copywriting has dedicated tools
- **9 Intelligent Agents** - Critics that evaluate your copy, judges that pick winners, and systems that evolve and improve
- **The Arena** - A revolutionary competitive system where copywriters compete on YOUR projects, with the skills improving after every match

This represents:

- 882+ copywriting frameworks extracted and encoded
 - Hundreds of hours of methodology analysis
 - A system that gets BETTER the more you use it
-

Prerequisites

Before installing, ensure you have:

1. Claude Code CLI installed and working

- You should be able to open a terminal and type `claude` to start a session
- If not installed, visit: <https://claude.ai/code>

2. A working terminal

- Mac: Terminal app (built-in)
 - Windows: PowerShell (built-in)
-

Installation Instructions

For Mac Users

Option A: Run from Claude Code CLI (Recommended)

1. Download and unzip `ZenithPro-Copy-Arsenal-v1.0.zip`
2. Open Claude Code CLI in your terminal
3. Navigate to the unzipped folder:

```
cd /path/to/ZenithPro-Copy-Arsenal-v1.0
```

4. Ask Claude to run the installer:

```
Run the install.sh script in this folder
```

5. Follow the prompts to enter your name and email (for license registration)
6. Installation complete!

Option B: Run directly from Terminal

1. Download and unzip `ZenithPro-Copy-Arsenal-v1.0.zip`
2. Open Terminal
3. Navigate to the unzipped folder:

```
cd /path/to/ZenithPro-Copy-Arsenal-v1.0
```

4. Run the installer:

```
./install.sh
```

5. Follow the prompts

For Windows Users

Option A: Run from Claude Code CLI (Recommended)

1. Download and unzip `ZenithPro-Copy-Arsenal-v1.0.zip`

2. Open Claude Code CLI in PowerShell

3. Navigate to the unzipped folder:

```
cd C:\path\to\ZenithPro-Copy-Arsenal-v1.0
```

4. Ask Claude to run the installer:

```
Run the install.ps1 script in this folder
```

5. Follow the prompts to enter your name and email

6. Installation complete!

Option B: Run directly from PowerShell

1. Download and unzip `ZenithPro-Copy-Arsenal-v1.0.zip`

2. Open PowerShell as Administrator

3. Navigate to the unzipped folder:

```
cd C:\path\to\ZenithPro-Copy-Arsenal-v1.0
```

4. Enable script execution (if needed):

```
Set-ExecutionPolicy -ExecutionPolicy RemoteSigned -Scope CurrentUser
```

5. Run the installer:

```
.\install.ps1
```

6. Follow the prompts

What Gets Installed

The installer creates the following structure:

```
~/./claude/
├── skills/                # 51 copywriting skills
│   ├── clayton/          # Master orchestrator
│   │   ├── clayton-headlines/ # Headlines skill
│   │   ├── clayton-leads/    # Leads skill
│   │   └── ... (12 more Clayton skills)
│   ├── carlton/          # Master orchestrator
│   │   └── ... (15 more Carlton skills)
│   ├── deutsch/          # Master orchestrator
│   │   └── ... (9 more Deutsch skills)
│   ├── evaldo/           # Master orchestrator
│   │   └── ... (8 more Evaldo skills)
│   └── copywriting-arena/ # Arena system
└──
├── agents/               # 9 intelligent agents
│   ├── clayton-critic/
│   ├── carlton-critic/
│   ├── deutsch-critic/
│   ├── evaldo-critic/
│   └── marketplace-judge/
```

```
| |— arena-synthesist/
| |— synthesis-critic/
| |— skill-evolver/
| |— copywriter-spawner/
|
|— arena/          # Arena system files
| |— ledger.md      # Match history
| |— config.md      # Your settings
| |— win-records/   # Per-copywriter records
| |— synthesis-registry/ # Combination tracking
| |— sample-briefs/  # Test briefs
|
|— docs/
    |— copy-arsenal/  # All documentation
```

Verifying Installation

After installation, test that everything works:

1. Open Claude Code CLI
2. Try a simple command:

```
/clayton-headlines
```

3. You should see Claude load the Clayton Headlines skill
4. Try the Arena:

```
/arena test 1
```

5. The Arena should initialize and ask for a project brief
-

Troubleshooting

"Command not found" when running install script

Mac: Make sure the script is executable:

```
chmod +x install.sh
```

Windows: Make sure you've enabled script execution (see installation steps above)

Skills not appearing after installation

1. Restart Claude Code CLI completely (close terminal, reopen)
2. Check that files exist in `~/.claude/skills/`
3. Try running `/skill list` to see available skills

"Permission denied" errors

Mac: You may need to run with sudo:

```
sudo ./install.sh
```

Windows: Run PowerShell as Administrator

Arena not creating project folders

Check your Arena config file at `~/.claude/arena/config.md` and verify the output path is correct for your system.

Updating

When a new version of the Copy Arsenal is released:

1. Download the new version

2. Run the installer again
 3. It will update existing files while preserving your Arena history and win records
-

Uninstalling

To remove the Copy Arsenal:

1. Delete the skill folders from `~/.claude/skills/`
 2. Delete the agent folders from `~/.claude/agents/`
 3. Delete the arena folder from `~/.claude/arena/`
 4. Delete the docs folder from `~/.claude/docs/copy-arsenal/`
-

License

This software is exclusively licensed to ZenithPro members.

You may NOT:

- Share this with anyone outside ZenithPro
- Redistribute in any form
- Remove the license tracking

Your installation is registered and tracked.

Next Steps

After installation:

1. Read `01-QUICK-START.md` for your first 5 minutes

2. Read `02-THE-FOUR-MASTERS.md` to understand each copywriter
 3. Read `05-THE-ARENA-COMPLETE-GUIDE.md` to understand the evolution system
-

ZenithPro Copy Arsenal v1.0

Created by Rich Schefren for ZenithPro Members

Quick Start Guide

Your First 5 Minutes with the Copy Arsenal

You Just Installed Something Powerful

You now have access to the methodologies of four legendary copywriters, encoded into AI skills that you can use instantly. Let's get you writing better copy in the next 5 minutes.

Your First Command (2 minutes)

Let's improve a headline right now.

Step 1: Open Claude Code CLI

Open your terminal and start Claude Code:

```
claude
```

Step 2: Run the Headlines Skill

Type:

Step 3: Give It Your Headline

When Claude prompts you, paste in a headline you want to improve. For example:

"How to Get More Clients for Your Consulting Business"

Step 4: Watch the Magic

Clayton's methodology will:

1. Evaluate your headline against his "A-Brain" test (does it trigger primal emotion?)
2. Check for emotional trigger words
3. Generate 5+ improved versions
4. Explain what makes each one stronger

Example output:

Original: "How to Get More Clients for Your Consulting Business"

Clayton Rating: 3/10 (engages thinking brain, not lizard brain)

Improved versions:

1. "THEY LIED TO YOU About Why You're Not Getting Clients"
 2. "The \$47,000 Mistake Every Consultant Makes (Are You Next?)"
 3. "WARNING: Your 'Marketing' Is Repelling Your Best Clients"
 4. "EXPOSED: The Real Reason Consultants Struggle While Amateurs Thrive"
 5. "SHAMELESS Gurus Left You With a Graveyard of Failed Tactics"
-

Try a Different Style (1 minute)

Each copywriter has a different approach. Try the same headline with Carlton:

/carlton-hooks

Carlton specializes in "incongruous juxtaposition" - surprising combinations that stop the scroll.

Carlton might produce:

"The Consultant Who Made \$2M Last Year... Working 3 Days a Week... From a Coffee Shop in Bali... While His 'Competitors' Burned Out Chasing Clients"

Different style. Different strengths. Same goal: better copy.

Run Your First Competition (2 minutes)

Want to see all four copywriters compete on your project?

Step 1: Start the Arena

/arena my-headline 1

Step 2: Provide the Brief

When prompted, describe what you need:

I need a headline for a landing page.

Target: Strategic consultants who've tried marketing tactics without success.

Offer: A free positioning assessment.

Tone: Sophisticated, not hype-y.

Step 3: Watch Them Compete

The Arena will:

- 1. Have all 4 copywriters draft their version
- 2. Have critics evaluate each draft
- 3. Have copywriters revise based on feedback
- 4. Have the Marketplace Judge declare a winner
- 5. Show you all 5 versions (4 pure + 1 synthesis)

Step 4: Pick Your Winner

You get to see 5 different approaches and choose the one that resonates most.

What You Can Do Now

Task	Command	What It Does
Improve a headline	/clayton-headlines	Emotional triggers, A-brain test
Write a hook	/carlton-hooks	Stopping power, incongruous juxtaposition
Write an opening	/deutsch-leads	Story-driven, dual journey
Write VSL opening	/evaldo-leads	Croc brain activation, gradual belief
Improve bullets	/clayton-bullets	Fascinations, curiosity
Compete on anything	/arena [name] [rounds]	All 4 copywriters compete

Pro Tips

1. Be Specific

The more context you give, the better the output:

- Who is the audience?
- What have they tried before?
- What's the price point?
- What's the awareness level?

2. Use Element Skills for Surgical Fixes

Don't rewrite your entire landing page if only the headline is weak. Use `/clayton-headlines` just for headlines.

3. Use the Arena for Big Projects

Writing a full sales letter? Run the Arena. You'll get 5 complete versions and learn what works best for your specific project.

4. Read the Output Explanations

Each skill doesn't just give you copy - it explains WHY it works. This teaches you the methodology.

Next Steps

Now that you've got the basics:

1. **Read** `02-THE-FOUR-MASTERS.md` to understand each copywriter's strengths
 2. **Read** `03-WHICH-COPYWRITER-WHEN.md` for the decision tree
 3. **Try improving your ZenithPro outputs** - see `09-YOUR-ZENITHPRO-OUTPUTS.md`
-

Stuck?

See `10-TROUBLESHOOTING.md` for common issues.

You now have more copywriting firepower than most agencies. Use it wisely.

The Four Masters

Understanding Your Copywriting Arsenal

What Makes This System Different

You're not getting generic "AI copywriting." You're getting the actual methodologies of four of the greatest direct response copywriters who ever lived - extracted, encoded, and made usable.

Each of these masters developed their techniques over decades of real-world testing. They wrote copy that generated hundreds of millions of dollars. Their frameworks weren't invented - they were discovered through relentless testing and refinement.

What went into building this system:

- **Clayton Makepeace:** 514 frameworks extracted from his complete body of work
- **John Carlton:** 200+ frameworks from the Simple Writing System and decades of teaching
- **David Deutsch:** 102 frameworks from A-List Copywriting Secrets
- **Evaldo Albuquerque:** 66 frameworks from his VSL mastery system

This represents thousands of pages of source material, hundreds of hours of extraction work, and careful encoding into AI-usable skills.

Clayton Makepeace

The Emotional Architect

Background: Clayton was one of the highest-paid copywriters in history, generating over \$1.5 billion in sales. He specialized in health and financial markets, where proof and emotion must work together.

Core Philosophy: "Identify the dominant resident emotion and activate it."

Clayton believed that every prospect has a dominant emotion already living inside them - fear, anger, greed, hope. Your job isn't to create emotion; it's to identify which one is already there and pour gasoline on it.

What Clayton Does Best

Strength	How It Shows Up
Emotional Triggers	29 resident emotions mapped with activation sequences
Proof Cascades	13 distinct proof strategies that build overwhelming belief
Headlines	"A-Brain" targeting - hits the lizard brain first
Voice	Indignation FOR the reader, shared enemy creation

Clayton's Signature Techniques

The A-Brain Test: Does your headline trigger the lizard brain (fear, anger, greed) or the thinking brain (curiosity, logic)? Clayton always targets the lizard brain first.

Proof Density: Clayton doesn't put proof in one section. He layers it throughout - social proof, expert proof, demonstration proof, statistical proof - until disbelief is impossible.

Dominant Emotion Selection: Before writing a word, Clayton identifies which emotion is ALREADY dominant in the prospect and builds the entire piece around activating it.

When to Use Clayton

- Health and financial markets
- Skeptical buyers who need overwhelming proof
- When you need emotional intensity
- When you want copy that feels "hard-hitting"
- When building belief is the primary challenge

Clayton's Skills (15 total)

Skill	Purpose
/clayton	Full methodology orchestrator
/clayton-headlines	A-Brain headlines, emotional triggers
/clayton-leads	Opening hooks based on dominant emotion
/clayton-body-copy	Emotional architecture, bucket brigades
/clayton-bullets	Fascinations that create "must-know" curiosity
/clayton-proof	13 proof strategies, credibility cascades
/clayton-offers	Offer stacking, value building
/clayton-closes	Urgency sequences, action triggers
/clayton-email	Email campaigns, subject lines
/clayton-psychology	29 emotions, buyer psychology
/clayton-process	Writing methodology
/clayton-structure	Copy architecture

Skill	Purpose
/clayton-testing	Testing and optimization
/clayton-business	Copywriting business economics
/clayton-events	Event copy

John Carlton

The Stopping Power Specialist

Background: Carlton wrote the most-mailed sales letter in history. He's famous for taking complex products and making them impossible to ignore. His "Simple Writing System" has trained thousands of copywriters.

Core Philosophy: "Stop them cold. Make them unable to look away."

Carlton believes the biggest problem in marketing isn't persuasion - it's attention. If you can't stop someone mid-scroll, nothing else matters. His techniques are designed to create that irresistible "what the hell is THIS?" moment.

What Carlton Does Best

Strength	How It Shows Up
Hooks	"Incongruous juxtaposition" - unexpected combinations that stop the scroll
Voice	"Bar room" conversational tone, like talking to a friend
Specificity	Hyper-specific details that create believability
Personality	Strong point of view that polarizes (on purpose)

Carlton's Signature Techniques

Incongruous Juxtaposition: Put together two things that don't seem to belong together. "The one-legged golfer who outdrives pros half his age." The brain can't ignore the mismatch.

The Bar Room Voice: Write like you're telling a story to a friend at a bar. No corporate speak. No fancy words. Just real talk.

A-Brain Triggers: Similar to Clayton's lizard brain, Carlton targets primal motivations: survival, reproduction, status, belonging.

The One-Two Punch: Emotional hit first, then logical justification. Never lead with logic.

When to Use Carlton

- Products that need "stopping power"
- Markets that have seen everything (jaded prospects)
- When you need a strong, distinctive voice
- Golf, fitness, self-improvement markets
- When personality should shine through

Carlton's Skills (16 total)

Skill	Purpose
/carlton	Full methodology orchestrator
/carlton-headlines	Attention-grabbing headlines
/carlton-hooks	Incongruous juxtaposition, pattern interrupts
/carlton-leads	Opening sequences
/carlton-body	Main copy with bar room voice
/carlton-bullets	Fascination-style bullets
/carlton-close	Closing sequences

Skill	Purpose
/carlton-offers	Offer construction
/carlton-testimonials	Using proof effectively
/carlton-research	Market research methodology
/carlton-strategy	Strategic planning
/carlton-structure	Copy architecture
/carlton-psychology	Buyer psychology
/carlton-voice	Voice and tone
/carlton-turbulence	Creating urgency
/carlton-features-benefits	Feature-to-benefit translation

David Deutsch

The Story Architect

Background: Deutsch is the master of "A-list" copywriting - the sophisticated, story-driven approach that works on educated, skeptical buyers. His copy doesn't feel like copy; it feels like a conversation with a trusted advisor.

Core Philosophy: "Take them on a dual journey - rational and emotional - where both paths lead to the same conclusion."

Deutsch believes that sophisticated buyers have two decision-making systems running simultaneously. You need to satisfy BOTH the logical mind AND the emotional heart. His copy creates two parallel journeys that converge at the purchase decision.

What Deutsch Does Best

Strength	How It Shows Up
Dual Journey	Rational + emotional paths that converge
Story Integration	Copy that doesn't feel like copy
Resistance-Free Selling	"Just Talk" method that bypasses defenses
Sophisticated Voice	Trusted advisor, not salesperson

Deutsch's Signature Techniques

The Dual Journey: Every piece has two threads - one for the logical mind (evidence, reasoning) and one for the emotional heart (stories, identification). Both must arrive at the same destination.

The Just Talk Method: Write as if you're having a conversation with one person. Remove all "salesy" language. Let the product sell itself through genuine dialogue.

The Crossroads Close: At the close, present two futures - one where they buy, one where they don't. Make both vivid. Let them choose.

10 Emotional Triggers: Deutsch's specific emotional levers, different from Clayton's 29 - more focused on identity and transformation.

When to Use Deutsch

- Sophisticated, educated buyers
- B2B and high-ticket offers
- When the audience resists "marketing"
- Story-driven long-form content
- When trust is the primary challenge

Deutsch's Skills (10 total)

Skill	Purpose
/deutsch	Full methodology orchestrator
/deutsch-headlines	4 C's + 2 H's headline formula
/deutsch-leads	Dual journey openings
/deutsch-body	Story-integrated body copy
/deutsch-bullets	Sophisticated fascinations
/deutsch-close	Crossroads close, future fork
/deutsch-psychology	10 emotional triggers
/deutsch-stories	Story construction
/deutsch-strategy	Strategic approach
/deutsch-process	Energy-based revision

Evaldo Albuquerque

The VSL Master

Background: Evaldo wrote some of the most successful VSLs (Video Sales Letters) in the health market. His specialty is taking skeptical, "burned before" buyers and methodically building belief until purchase becomes inevitable.

Core Philosophy: "Reduce everything to the One Belief. If they believe that one thing, they'll buy."

Evaldo doesn't try to convince prospects of 10 things. He identifies the ONE belief that, if accepted, makes everything else fall into place. Then he builds the entire piece around installing that single belief.

What Evaldo Does Best

Strength	How It Shows Up
VSL Structure	The 10 Questions framework for video scripts
Croc Brain Filters	Targeting the primitive brain
Gradual Belief Building	Slow, methodical conviction
One Belief Focus	Single-minded persuasion

Evaldo's Signature Techniques

The One Belief Formula: What's the single belief that, if installed, makes purchase logical? Build everything around that.

The 10 Questions: A structural framework for VSLs that answers the questions prospects are unconsciously asking, in the right order.

Croc Brain Filters: The "crocodile brain" (primitive survival brain) filters everything before it reaches the logical brain. Evaldo's techniques get past those filters.

The Three Box Check: Validate ideas against three criteria before using them.

When to Use Evaldo

- VSLs specifically
- Skeptical buyers who've been burned before
- Health and supplement markets
- When you need gradual belief building
- Products with complex mechanisms to explain

Evaldo's Skills (9 total)

Skill	Purpose
/evaldo	Full methodology orchestrator
/evaldo-headlines	Curiosity-based headlines
/evaldo-leads	Croc brain activation openings
/evaldo-body	Belief-building body copy
/evaldo-bullets	Curiosity mechanics
/evaldo-close	Offer presentation, price anchoring
/evaldo-ideas	Big idea development
/evaldo-lifts	Supporting emails and content
/evaldo-philosophy	Core methodology

Comparing the Masters

Dimension	Clayton	Carlton	Deutsch	Evaldo
Primary Strength	Emotional intensity	Stopping power	Story sophistication	VSL structure
Voice	Indignant, charged	Conversational, bold	Trusted advisor	Methodical, building
Best For	Health, finance	Golf, fitness, jaded markets	B2B, educated buyers	VSLs, skeptics
Proof Style	Overwhelming cascade	Specific, concrete	Woven into story	Gradual, methodical
Framework Count	514	200+	102	66

Dimension	Clayton	Carlton	Deutsch	Evaldo
Signature Move	A-Brain test	Incongruous juxtaposition	Dual journey	One Belief

They Work Together

The real power comes from combining them:

- **Clayton's emotional triggers + Deutsch's story structure** = Emotionally charged narrative
- **Carlton's hooks + Evaldo's belief building** = Attention that converts
- **Deutsch's sophistication + Clayton's proof** = Believable elegance

This is what the **Synthesis** competitor does in the Arena - and why it sometimes wins.

"In copywriting, there is no one right way. There are many right ways, each suited to different markets, products, and buyers. Your job is to match the method to the moment."

— The principle behind the Copy Arsenal

Which Copywriter When

The Decision Tree for Choosing Your Approach

The Quick Answer

If you're in a hurry:

Situation	Use This
Need emotional punch	Clayton
Need to stop the scroll	Carlton
Sophisticated/educated audience	Deutsch
Writing a VSL	Evaldo
Not sure	Run the Arena

The Decision Tree

Start Here: What Are You Writing?

WHAT ARE YOU CREATING?

|

└─ HEADLINE ONLY

| └─ Need emotional trigger? → /clayton-headlines

| └─ Need pattern interrupt? → /carlton-hooks

| └─ Need sophistication? → /deutsch-headlines

| └─ Not sure? → Run all three, pick best

|

└─ LEAD/OPENING (First 100-500 words)

| └─ Story-driven? → /deutsch-leads

| └─ VSL format? → /evaldo-leads

| └─ Emotional punch? → /clayton-leads

| └─ Need to hook fast? → /carlton-leads

|

└─ FULL LANDING PAGE

| └─ See "By Audience" below

| └─ Or run /arena landing-page 1

- |
- | — FULL SALES LETTER
- | | — See "By Audience" below
- | | — Or run /arena sales-letter 1
- |
- | — VSL SCRIPT
- | | — Start with /evaldo (he owns this format)
- | | — Then consider /carlton for hooks
- |
- | — EMAIL SEQUENCE
- | | — /clayton-email (38 frameworks)
- | | — Or /evaldo-lifts for supporting emails
- |
- | — BULLETS/FASCINATIONS
- | | — Curiosity-focused? → /evaldo-bullets
- | | — Emotional triggers? → /clayton-bullets
- | | — Specificity-focused? → /carlton-bullets
- |
- | — FULL CAMPAIGN
- | | — Run the Arena for each piece

By Audience Type

WHO IS YOUR AUDIENCE?

- |
- | — SKEPTICAL / BURNED BEFORE
- | | (They've bought courses, tried tactics, been disappointed)
- | |
- | | — Primary: /evaldo
- | | — - Gradual belief building

| | - One Belief focus

| | - Methodical conviction

| |

| └─ Secondary: /clayton

| - Proof cascades

| - Overwhelming evidence

| - Shared enemy (the gurus who burned them)

|

| └─ SOPHISTICATED / EDUCATED

| | (MBAs, executives, professionals who hate "marketing")

| |

| └─ Primary: /deutsch

| - Dual journey (logic + emotion)

| - Story-driven approach

| - Trusted advisor voice

| - Doesn't feel like sales

|

| └─ JADED / SEEN EVERYTHING

| | (Been in the market forever, nothing surprises them)

| |

| └─ Primary: /carlton

| - Incongruous juxtaposition

| - Pattern interrupts

| - "What the hell is THIS?" factor

| - Bold, distinctive voice

|

| └─ EMOTIONAL / DESPERATE

| | (Health crisis, financial fear, relationship problems)

| |

| └─ Primary: /clayton

| - Dominant emotion activation

| - 29 emotional triggers

- | - Indignation for the reader
- | - Powerful urgency
- |
- └ GENERAL / MIXED
- |
- └ Run the Arena
 - Let the copywriters compete
 - See what works for YOUR specific case

By Copy Element

WHAT ELEMENT NEEDS WORK?

- |
- └ HEADLINE
 - | |
 - | └ Emotional punch needed → /clayton-headlines
 - | | Gate check: Does it trigger lizard brain?
 - | |
 - | └ Stopping power needed → /carlton-hooks
 - | | Gate check: Would they stop scrolling?
 - | |
 - | └ Sophistication needed → /deutsch-headlines
 - | | Gate check: 4 C's + 2 H's formula
 - | |
 - | └ VSL headline → /evaldo-headlines
 - | Gate check: Opens curiosity loop?
- |
- └ OPENING / LEAD
 - | |
 - | └ Story opening → /deutsch-leads

- | | — VSL opening → /evaldo-leads

- | | — Emotional opening → /clayton-leads

- | | — Hook opening → /carlton-leads

- |

- | — BODY COPY

- | |

- | | — Needs more proof → /clayton-proof + /clayton-body-copy

- | | — Needs better flow → /deutsch-body (energy audit)

- | | — Needs more personality → /carlton-body

- | | — Needs belief building → /evaldo-body

- |

- | — BULLETS

- | |

- | | — Need curiosity → /evaldo-bullets

- | | — Need emotional triggers → /clayton-bullets

- | | — Need specificity → /carlton-bullets

- |

- | — OFFER SECTION

- | |

- | | — Need value stacking → /clayton-offers

- | | — Need simplicity → /carlton-offers

- | | — Need price anchoring → /evaldo-close

- |

- | — CLOSE

- | |

- | | — Need urgency → /clayton-closes

- | | — Need future fork → /deutsch-close

- | | — Need objection handling → /evaldo-close

- |

- | — EMAIL

- |

└─ /clayton-email (most complete)

38 frameworks for sequences, subject lines, campaigns

By Market/Industry

Industry	Primary	Why	Secondary
Health/Supplements	Clayton	Proof density, emotional triggers	Evaldo for VSLs
Finance/Investment	Clayton	Fear/greed mastery	Deutsch for sophisticated investors
B2B/Consulting	Deutsch	Trusted advisor voice	Carlton for differentiation
Golf/Sports	Carlton	His specialty market	Clayton for emotional intensity
Self-Improvement	Carlton	Personality-driven	Deutsch for sophisticated seekers
Info Products	Evaldo	VSL structure	Clayton for proof
SaaS/Tech	Deutsch	Sophisticated buyers	Carlton for differentiation
Coaching	Deutsch	Relationship-based	Evaldo for belief building

By Price Point

Price	Primary	Rationale
Free (Lead Magnet)	Carlton or Clayton	Need stopping power, quick decision

Price	Primary	Rationale
Low (\$1-\$100)	Carlton or Evaldo	Impulse-friendly, curiosity-driven
Mid (\$100-\$500)	Any	Match to audience type
High (\$500-\$2000)	Deutsch or Evaldo	Need belief building, sophistication
Premium (\$2000+)	Deutsch	Trust, relationship, dual journey

When to Use the Arena

Always consider the Arena when:

1. You're not sure which approach is best
2. You're writing something important (main sales page, VSL)
3. You want to see multiple approaches compared
4. You want the skills to improve over time
5. You have time for a thorough process

Skip the Arena when:

1. Quick surgical fix (just the headline)
 2. You know exactly which style fits
 3. Time-sensitive (need it in 10 minutes)
-

Combination Strategies

Sometimes the best approach combines multiple masters:

The "Stop and Build" Combo

- **Carlton hook** (stop them)
- **Evaldo body** (build belief)
- **Clayton close** (drive action)

The "Sophisticated Punch" Combo

- **Deutsch opening** (trust building)
- **Clayton proof** (overwhelming evidence)
- **Deutsch close** (future fork)

The "VSL Power" Combo

- **Evaldo structure** (10 Questions)
- **Carlton hooks** (pattern interrupts throughout)
- **Clayton emotional beats** (intensity)

The Arena's **Synthesis competitor automatically explores these combinations.**

Quick Reference Card

Print this or keep it handy:

COPY ARSENAL QUICK REFERENCE	
CLAYTON = Emotional triggers, proof, intensity	
CARLTON = Hooks, stopping power, personality	
DEUTSCH = Stories, sophistication, trust	
EVALDO = VSLs, belief building, skeptics	

Skeptical audience?	→ Evaldo or Clayton	
Sophisticated?	→ Deutsch	
Need attention?	→ Carlton	
Need emotion?	→ Clayton	
Writing a VSL?	→ Evaldo	
Not sure?	→ /arena [project] 1	

The best copywriter is the one who wins in YOUR specific situation. When in doubt, let them compete.

The Arena

The Revolutionary Evolutionary Copywriting System

What Makes the Arena Different

Most AI copywriting tools give you ONE output. You hope it's good. If it's not, you try again, hoping the next attempt is better. There's no learning. No improvement. No competitive pressure.

The Arena changes everything.

Instead of hoping for one good output, you get FIVE competing versions from four distinct methodologies (plus a strategic synthesis). A judge evaluates them based on predicted marketplace performance. The winner is declared. And here's the revolutionary part:

The losers LEARN from why they lost. The skills actually IMPROVE after every match.

This isn't just a tool. It's an evolutionary system where competition drives improvement.

Why This Matters

Traditional AI Copywriting:

You → AI → Output (hope it's good)

↓

Try again? (same AI, same approach)

The Arena:

You → 4 Copywriters + Synthesis → 5 Competing Outputs

↓

Critics Evaluate Each

↓

Each Revises Based on Feedback

↓

Judge Declares Winner

↓

Losers Learn What Winner Did Better

↓

Skills Update with New Knowledge

↓

NEXT TIME: All 5 are better than before

The more you use it, the better it gets.

How the Arena Works

The Flow

PHASE 0: SETUP

You provide a brief (what you need written)

PHASE 1: DRAFTING (Parallel)

All 5 copywriters write their version simultaneously

- Clayton drafts using emotional architecture
 - Carlton drafts using hooks and stopping power
 - Deutsch drafts using dual journey
 - Evaldo drafts using VSL structure
 - Synthesis drafts using strategic combination
-

PHASE 2: CRITIQUE (Parallel)

Each draft is evaluated by its methodology's critic

- Clayton-critic checks against 514 frameworks
 - Carlton-critic checks against 200+ frameworks
 - Deutsch-critic checks against 102 frameworks
 - Evaldo-critic checks against 66 frameworks
 - Synthesis-critic evaluates integration quality
-

PHASE 3: REVISION (Parallel)

Each copywriter revises based on their critic's feedback

PHASE 4: JUDGMENT

The Marketplace Judge evaluates all 5 revised entries

- NOT based on methodology adherence
- Based on predicted marketplace performance
- "Which would win in a split test?"

PHASE 5: LEARNING

Each copywriter receives:

- What they did well (preserve this)
- What hurt them (fix this)
- What the winner did (steal this)

SKILLS UPDATE

The Skill Evolver integrates learnings into skills

Next match, everyone is better

Multiple Rounds

You can run the Arena for multiple rounds:

```
/arena my-project 3
```

In a 3-round Arena:

- Round 1: All compete fresh
- Round 2: All compete with Round 1 learnings
- Round 3: All compete with Round 1+2 learnings
- Final: Best overall version declared

Each round makes everyone better.

Running Your First Arena

Step 1: Start the Arena

/arena landing-page 1

Format: /arena [project-name] [number-of-rounds]

Step 2: Provide Your Brief

When prompted, provide:

PRODUCT/SERVICE: [What you're selling]

TARGET MARKET: [Who you're selling to]

PRICE POINT: [How much]

KEY CONSTRAINTS: [Any limitations]

COPY TYPE: [Sales letter, VSL, landing page, email]

Example:

PRODUCT: The Positioning Intensive - a 4-hour virtual workshop

TARGET: Strategic consultants earning \$5K-50K/month who struggle with marketing

PRICE: \$497

CONSTRAINTS: Must feel sophisticated, not "markety"

COPY TYPE: Landing page

Step 3: Watch the Competition

The Arena will show you:

- Each copywriter drafting
- Critics providing feedback
- Revisions happening

- Final judgment

Step 4: See the Results

You'll receive:

- All 5 versions (complete copy)
- Ranking with scores
- Judge's explanation of why the winner won
- Learning briefs for each competitor

Step 5: Use the Winner (or Pick Your Favorite)

The judge declares a winner based on predicted conversion. But you can:

- Use the winner as-is
- Use a different version you prefer
- Combine elements from multiple versions
- Override the judge's decision (your override is recorded for future calibration)

The Marketplace Judge

How It Evaluates

The judge doesn't care about methodology adherence. It cares about ONE question:

"If these five versions ran as split tests against the same traffic, which would generate the most revenue?"

Evaluation Criteria

Criterion	Weight	What It Measures
Stopping Power	20%	Would they stop scrolling?
Believability	20%	Do they believe the promise is possible FOR THEM?
Desire Activation	20%	Does it awaken desire they didn't know they had?
Objection Handling	15%	Are real objections addressed?
Offer Clarity	10%	Do they know exactly what to do?
Risk Reversal	10%	Is "yes" easier than "no"?
Creative Strategy	5%	Right angle for this market?

The Judge's Output

ARENA JUDGMENT - Round 1

THE WINNER: Clayton

Why This Version Wins

Clayton's entry won because it addressed the fundamental trust issue in this market. Strategic consultants have been burned by marketing gurus before. Clayton's proof cascade - 5 specific case studies, expert endorsements, and the nuclear guarantee - overcame that skepticism in a way the other versions didn't match.

The Decisive Advantage

The "shameless gurus" enemy positioning in the headline created immediate identification. Prospects felt understood before they read a single word of body copy.

FULL RANKING

Rank	Copywriter	Score	Predicted Conversion
-----	-----	-----	-----
1	Clayton	87/100	Baseline
2	Synthesis	83/100	-5%
3	Evaldo	79/100	-9%
4	Deutsch	74/100	-15%
5	Carlton	71/100	-18%

The Synthesis Competitor

What Makes Synthesis Special

While Clayton, Carlton, Deutsch, and Evaldo each use their pure methodology, the Synthesis competitor strategically combines elements from all four.

Example Synthesis Strategy:

Primary: Evaldo's 10 Questions Structure (55%)

- Provides VSL architecture
- Handles skeptical buyer profile

Secondary: Carlton's Hooks + Turbulence (30%)

- Evaldo openings can be slow; need Carlton stopping power
- Add urgency elements Evaldo lacks

Tertiary: Deutsch's Crossroads Close (15%)

- Evaldo's close is transactional
- Deutsch's future-fork adds emotional weight

When Synthesis Wins

Synthesis tends to win when:

- No single methodology perfectly fits the project
- The brief requires multiple strengths
- Creative combination creates emergent advantages

Spawning New Copywriters

Here's where it gets exciting:

If Synthesis wins ALL rounds of an Arena, it can become a NEW copywriter.

SYNTHESIS SPAWNING TRIGGERED

Synthesis won all 3 rounds with this combination:

- 50% Evaldo (belief building)
- 30% Carlton (hooks)
- 20% Deutsch (close)

Do you want to codify this as a new copywriter?

Enter a name for this methodology: _____

If you name it, a new copywriter is created:

- New skill folder with the combined methodology
- New critic agent to evaluate its work
- New entry in the stable
- Competes in future arenas

This is how the system **EVOLVES**. New methodologies are born from successful synthesis.

Skill Evolution

How Skills Improve

After every Arena match, the Skill Evolver:

1. **Analyzes what the winner did**

- What frameworks were most effective?
- What techniques landed?
- What approach worked for this market?

2. **Identifies what losers missed**

- Where did they fall short?
- What should they have done differently?
- What can they learn?

3. **Proposes updates to skills**

- Minor updates (auto-applied): Clarifications, examples
- Major updates (require approval): New frameworks, structural changes

The Learning Ledger

All learning is tracked in `~/claude/arena/ledger.md`:

Arena Run History

#	Date	Project	Rounds	Winner	Key Learning
---	-----	-----	-----	-----	-----

1	2026-01-14	landing-page	1	Clayton	Proof cascade beats story for skeptics
2	2026-01-15	email-seq	3	Deutsch	Dual journey works for sophisticated B2B
3	2026-01-16	vsl-script	2	Evaldo	10 Questions structure owns VSL format

Viewing Skill Updates

After matches, you can see what changed:

Skill Updates Applied

Date	Skill	Update Type	Description
-----	-----	-----	-----
2026-01-14	deutsch	Minor	Added: "For skeptical markets, front-load proof"
2026-01-15	carlton	Major	Added: Sophisticated Market Adaptation Framework

Rollback Available

If a skill update doesn't work well, you can rollback:

```
/skill-rollback carlton
```

The last 3 versions of each skill are maintained.

Win Records

Each copywriter has a win record tracked in `~/claude/arena/win-records/`:

Clayton Makepeace - Win Record

****Total Matches:**** 7

****Wins:**** 4

****Win Rate:**** 57%

Head-to-Head Records

Opponent Wins Losses
----- ----- -----
Carlton 3 1
Deutsch 2 2
Evaldo 2 1
Synthesis 1 2

Strengths (Validated)

- Proof cascades in skeptical markets
- Emotional intensity for health/finance
- Nuclear guarantee architecture

Weaknesses (Exposed)

- Can feel "too much" for sophisticated B2B
- Story integration weaker than Deutsch
- Hooks less surprising than Carlton

Over time, you build a picture of which copywriter wins in which situations.

Best Practices

1. Provide Rich Briefs

The better your brief, the better the competition:

- Be specific about your audience
- Include what they've tried before
- Mention price point

- State any constraints

2. Run Multiple Rounds for Important Projects

One round shows you options. Multiple rounds show you EVOLUTION.

For a major sales page, run 3-5 rounds. Watch the copy get better each time.

3. Override When You Disagree

The judge predicts marketplace performance. But you know your market best.

If you disagree with the winner, override. Your override is recorded and helps calibrate future judgments.

4. Use Sample Briefs First

Before running your real project, try a sample brief:

```
/arena sample-landing-page 1
```

This lets you see the system in action without stakes.

5. Review the Learning

After each Arena, read:

- The judge's explanation
- The individual learning briefs
- What got updated

This teaches you the craft, not just the output.

Configuring the Arena

Change Output Location

Edit `~/.claude/arena/config.md` :

Output Location

ARENA_OUTPUT_PATH=~/Documents/My-Projects/

Exclude Copywriters

For a specific run:

/arena my-project 1 --exclude=carlton

Set Default Rounds

Edit `~/.claude/arena/config.md` :

Setting	Value
-----	-----
Default Rounds	3

The Power of Evolution

Traditional tools are static. They're the same today as they were yesterday.

The Arena is evolutionary.

January: Your copywriters compete at baseline

February: They've learned from 10 matches

March: They've learned from 30 matches

June: They've absorbed 6 months of competitive wisdom

December: They're dramatically better than when you started

Every match makes the system smarter. Every loss teaches a lesson. Every win validates a technique.

You're not just getting AI copywriting. You're building a copywriting intelligence that improves forever.

Quick Reference

Command	What It Does
<code>/arena [project] [rounds]</code>	Start a competition
<code>/arena sample-landing-page 1</code>	Test with sample brief
View <code>~/./claude/arena/ledger.md</code>	See match history
View <code>~/./claude/arena/win-records/</code>	See per-copywriter records
Edit <code>~/./claude/arena/config.md</code>	Change settings

The Arena: Where great copy is forged through competition.

Element Skills Reference

Every Skill in Your Copy Arsenal

How to Use This Reference

Each skill is designed for a specific copy element or task. Use this reference to find exactly what you need:

/[skill-name]

The skills are organized by copywriter, then by element type.

Clayton Makepeace Skills (15 Skills, 514 Frameworks)

Clayton's skills focus on emotional triggers, proof architecture, and conversion intensity.

Core Orchestrator

Skill	Command	What It Does
clayton	/clayton	Full copywriting workflow orchestrator. Use for complete sales letters, thorough rewrites, or any project requiring the complete Clayton methodology.

Element Skills

Skill	Command	Frameworks	Best For
clayton-headlines	/clayton-headlines	24 lead strategies, 10 templates	Writing headlines that trigger emotional response
clayton-leads	/clayton-leads	Multiple lead types	Opening copy that hooks and qualifies
clayton-body-copy	/clayton-body-copy	Body architecture	Main copy sections with proof and emotion
clayton-proof	/clayton-proof	13 proof strategies	Building overwhelming evidence
clayton-bullets	/clayton-bullets	Bullet frameworks	Fascinations that trigger desire

Skill	Command	Frameworks	Best For
clayton-offers	<code>/clayton-offers</code>	Offer architecture	Structuring irresistible offers
clayton-closes	<code>/clayton-closes</code>	10-step close	Driving immediate action
clayton-guarantees	<code>/clayton-guarantees</code>	Risk reversal	Making "yes" easier than "no"

Specialized Skills

Skill	Command	Frameworks	Best For
clayton-email	<code>/clayton-email</code>	38 email frameworks	Email sequences, campaigns, subject lines
clayton-events	<code>/clayton-events</code>	Event frameworks	Live event and webinar copy
clayton-testing	<code>/clayton-testing</code>	Testing methodology	A/B tests, optimization, control breaking
clayton-business	<code>/clayton-business</code>	Business frameworks	Pricing, client relationships, economics

Psychology Skills

Skill	Command	What It Covers
clayton-psychology	<code>/clayton-psychology</code>	29 emotional triggers, lizard brain appeals
clayton-voice	<code>/clayton-voice</code>	Clayton's distinctive voice patterns

John Carlton Skills (16 Skills, 200+ Frameworks)

Carlton's skills focus on hooks, stopping power, personality, and the Simple Writing System.

Core Orchestrator

Skill	Command	What It Does
carlton	/carlton	Full 17-point Simple Writing System workflow

Research & Strategy Skills

Skill	Command	Frameworks	Best For
carlton-research	/carlton-research	Steps 1-3	Market research, avatar creation, USP development
carlton-strategy	/carlton-strategy	Strategic planning	Campaign architecture

Element Skills

Skill	Command	Frameworks	Best For
carlton-hooks	/carlton-hooks	Incongruous juxtaposition	Pattern interrupts, attention grabbing
carlton-headlines	/carlton-headlines	Headline formulas	Headlines that stop the scroll
carlton-leads	/carlton-leads	Lead structures	Opening hooks with personality
carlton-body	/carlton-body	Body copy frameworks	Story integration, proof, flow
carlton-bullets	/carlton-bullets	One-Two Punch method	Fascinations with specificity

Skill	Command	Frameworks	Best For
carlton-offers	<code>/carlton-offers</code>	Offer frameworks	Simple, clear offer presentation
carlton-closes	<code>/carlton-closes</code>	Close architecture	Risk reversal, guarantees
carlton-guarantees	<code>/carlton-guarantees</code>	Step 14 frameworks	Risk reversal mastery

Voice & Style Skills

Skill	Command	What It Covers
carlton-voice	<code>/carlton-voice</code>	Bar room voice, A-Brain writing
carlton-personality	<code>/carlton-personality</code>	Personality injection techniques

Specialized Skills

Skill	Command	What It Covers
carlton-stories	<code>/carlton-stories</code>	Story frameworks for sales copy
carlton-psychology	<code>/carlton-psychology</code>	A-Brain triggers, primitive appeals

David Deutsch Skills (10 Skills, 102 Frameworks)

Deutsch's skills focus on dual journey, sophistication, and story-driven selling.

Core Orchestrator

Skill	Command	What It Does
deutsch	/deutsch	Complete Deutsch methodology workflow

Element Skills

Skill	Command	Frameworks	Best For
deutsch-leads	/deutsch-leads	Dual journey structure	Story-driven openings for sophisticated audiences
deutsch-body	/deutsch-body	Energy audit, flow	Body copy with parallel logic/emotion journeys
deutsch-bullets	/deutsch-bullets	Bullet polishing	Curiosity with sophistication
deutsch-close	/deutsch-close	Crossroads close	Future-fork emotional closes
deutsch-headlines	/deutsch-headlines	4 C's + 2 H's	Headlines for educated buyers

Psychology & Strategy Skills

Skill	Command	What It Covers
deutsch-psychology	/deutsch-psychology	10 emotional triggers, transformation principles
deutsch-voice	/deutsch-voice	Trusted advisor tone

Evaldo Albuquerque Skills (9 Skills, 66 Frameworks)

Evaldo's skills focus on VSL structure, belief building, and the One Belief methodology.

Core Orchestrator

Skill	Command	What It Does
evaldo	/evaldo	Complete VSL creation workflow

Element Skills

Skill	Command	Frameworks	Best For
evaldo-leads	/evaldo-leads	10 Questions structure	VSL openings that build belief
evaldo-body	/evaldo-body	Belief building	Mechanism explanation, proof
evaldo-bullets	/evaldo-bullets	Curiosity mechanics	Fascinations that open loops
evaldo-close	/evaldo-close	VSL close structure	Price anchoring, stacking, objections
evaldo-headlines	/evaldo-headlines	13 headline boosters	VSL headlines with open loops

Specialized Skills

Skill	Command	What It Covers
evaldo-lifts	/evaldo-lifts	DICK method
evaldo-psychology	/evaldo-psychology	One Belief formula, belief architecture

Arena System Skill

Skill	Command	What It Does
copywriting-arena	<code>/arena [project] [rounds]</code>	Runs competitive copywriting match between all 4 copywriters + synthesis

Quick Lookup by Task

"I need to write a headline"

Audience	Use This
Emotional/health/finance	<code>/clayton-headlines</code>
Jaded/sophisticated	<code>/carlton-hooks</code>
B2B/educated	<code>/deutsch-headlines</code>
VSL format	<code>/evaldo-headlines</code>
Not sure	Run all four, pick best

"I need to write an opening"

Style	Use This
Story-driven	<code>/deutsch-leads</code>
VSL format	<code>/evaldo-leads</code>
Emotional punch	<code>/clayton-leads</code>
Pattern interrupt	<code>/carlton-leads</code>

"I need to write bullets"

Goal	Use This
Maximum curiosity	/evaldo-bullets
Emotional triggers	/clayton-bullets
Specificity/credibility	/carlton-bullets
Sophisticated audience	/deutsch-bullets

"I need to write a close"

Style	Use This
Urgency/scarcity	/clayton-closes
Future fork	/deutsch-close
Objection handling	/evaldo-close
Risk reversal	/carlton-closes

"I need to write emails"

Type	Use This
Campaigns/sequences	/clayton-email
Traffic to VSL	/evaldo-lifts

"I need a complete sales page"

Approach	Use This
Full Clayton method	/clayton
Full Carlton method	/carlton

Approach	Use This
Full Deutsch method	/deutsch
Full Evaldo method	/evaldo
Compare all four	/arena landing-page 1

Framework Counts by Copywriter

Copywriter	Total Frameworks	Skills	Specialty
Clayton Makepeace	514	15	Emotional intensity, proof
John Carlton	200+	16	Hooks, personality
David Deutsch	102	10	Sophistication, story
Evaldo Albuquerque	66	9	VSL, belief building
TOTAL	882+	51	

Skill Naming Convention

All skills follow this pattern:

[copywriter]-[element]

Examples:

- [clayton-headlines](#) = Clayton's headline frameworks
- [carlton-hooks](#) = Carlton's hook frameworks
- [deutsch-leads](#) = Deutsch's lead frameworks

- `evaldo-close` = Evaldo's close frameworks

The main orchestrator for each copywriter is just their name:

- `/clayton` = Full Clayton workflow
 - `/carlton` = Full Carlton workflow
 - `/deutsch` = Full Deutsch workflow
 - `/evaldo` = Full Evaldo workflow
-

51 skills. 882+ frameworks. Four masters. One Arsenal.

Workflow: Improve Headlines

Transform Weak Headlines Into Scroll-Stopppers

When to Use This Workflow

Use this workflow when you:

- Have a headline that's not converting
 - Need to test multiple headline approaches
 - Want to strengthen an existing headline
 - Are optimizing a control
-

The 3-Step Headline Improvement Process

Step 1: Diagnose the Current Headline

Before improving, understand what's wrong. Ask Claude Code:

Analyze this headline using Clayton's emotional triggers framework:

"[Your current headline]"

What's working? What's missing? What emotional triggers could be added?

What You'll Learn:

- Which of the 29 emotions it triggers (or doesn't)
- Whether it passes the "lizard brain" test
- Specific weakness areas

Step 2: Generate Alternative Headlines

Run your headline through multiple masters:

For Emotional Punch:

/clayton-headlines

Here's my current headline: "[Your headline]"

Target audience: [Describe them]

Key promise: [What they get]

Generate 10 headline alternatives that trigger stronger emotional response.

For Stopping Power:

/carlton-hooks

Here's my current headline: "[Your headline]"

Target audience: [Describe them]

Generate 10 headline alternatives using incongruous juxtaposition to create pattern interrupts.

For Sophisticated Audiences:

/deutsch-headlines

Here's my current headline: "[Your headline]"

Target audience: [Sophisticated B2B buyers / educated professionals]

Generate 10 headline alternatives that pass the 4 C's + 2 H's test.

For VSL Headlines:

/evaldo-headlines

Here's my current headline: "[Your headline]"

This is for a VSL about: [Topic]

Generate 10 headline alternatives with open loops and curiosity triggers.

Step 3: Competitive Selection

If you want ALL four masters to compete:

/arena headline-test 1

BRIEF:

Current headline: "[Your headline]"

Audience: [Description]

Product: [What you're selling]

Current performance: [If known - CTR, conversion, etc.]

Each copywriter should generate their best 3 headline alternatives.

The Arena will:

1. Have each master generate alternatives
 2. Critics evaluate against their frameworks
 3. Revisions made
 4. Judge selects the predicted winner
-

Headline Diagnostic Checklist

Before finalizing, verify your headline:

Clayton Test (Emotional Triggers):

- ☐ Triggers at least one of the 29 emotions
- ☐ Passes the "croc brain" filter (simple, concrete, emotional)
- ☐ Creates urgency or curiosity
- ☐ Promises a specific benefit

Carlton Test (Stopping Power):

- ☐ Would make someone stop scrolling
- ☐ Contains an unexpected element
- ☐ Speaks in their language (not marketing-speak)
- ☐ Has personality

Deutsch Test (4 C's + 2 H's):

- ☐ Clear - They understand what it's about

- ☐ Compelling - They want to know more
- ☐ Credible - They believe it's possible
- ☐ Customer-focused - It's about THEM
- ☐ Hope - It promises a better future
- ☐ Help - It offers assistance

Evaldo Test (Curiosity Mechanics):

- ☐ Opens a loop that must be closed
 - ☐ Doesn't give away the answer
 - ☐ Creates a "must know" feeling
 - ☐ Hints at a mechanism or secret
-

Example: Headline Transformation

Original Headline:

"Learn How to Write Better Copy"

After Clayton:

"The 29 Emotional Triggers That Force Your Reader's Hand... Whether They Want to Buy or Not"

After Carlton:

"A One-Legged Golfer's Bizarre Discovery That Makes 'Copywriting Rules' Look Like a Sad Joke"

After Deutsch:

"Why the Best-Paid Writers Break Every 'Rule' You've Been Taught (And How to Ethically Steal Their Method)"

After Evaldo:

"The Strange Reason 97% of Copy Fails Before the First Sentence (And the

Quick Headline Improvement Commands

Emotional intensification:

/clayton-headlines

Add more emotional punch to: "[headline]"

Pattern interrupt:

/carlton-hooks

Make this stop the scroll: "[headline]"

Sophistication upgrade:

/deutsch-headlines

Make this appropriate for sophisticated buyers: "[headline]"

Curiosity enhancement:

/evaldo-headlines

Add more open loops to: "[headline]"

Testing Your Headlines

Once you have alternatives, test systematically:

1. **Internal gut check:** Which makes YOU want to read more?
2. **Audience check:** Show to someone in your target market

3. **A/B test:** If you have traffic, test the top 2-3
 4. **Arena prediction:** The judge's predicted conversion can guide testing priority
-

Great headlines aren't written. They're forged through iteration.

Workflow: Landing Page Creation

From Brief to High-Converting Page

When to Use This Workflow

Use this workflow when you need to:

- Create a new landing page from scratch
 - Rewrite an underperforming landing page
 - Create multiple landing page versions to test
-

Option 1: Single Copywriter Approach

If you know which copywriter fits your audience, use their full workflow:

For Skeptical/Burned Audiences

/evaldo

BRIEF:

Product: [What you're selling]

Price: \$[Amount]

Audience: [Description - emphasize they've been burned before]

Key mechanism: [What makes this work]

Desired action: [What you want them to do]

For Emotional/Desperate Audiences

/clayton

BRIEF:

Product: [What you're selling]

Price: \$[Amount]

Audience: [Description - emphasize their pain]

Key promise: [What transformation they'll experience]

Available proof: [Testimonials, stats, credentials]

For Sophisticated/B2B Audiences

/deutsch

BRIEF:

Product: [What you're selling]

Price: \$[Amount]

Audience: [Description - emphasize their sophistication]

Key story: [Transformation story if available]

Trust elements: [Credentials, client list, etc.]

For Jaded/Seen-Everything Audiences

/carlton

BRIEF:

Product: [What you're selling]

Price: \$[Amount]

Audience: [Description - emphasize what they've seen before]

Unique angle: [What makes this different]

Personality: [Brand voice direction]

Option 2: Arena Competition (Recommended)

Let all four masters compete and see what wins:

/arena landing-page 1

BRIEF:

Product: [What you're selling]

Price: \$[Amount]

Target market: [Who they are, what they've tried, what they believe]

Key promise: [The transformation]

Available proof: [Testimonials, case studies, stats]

Key objections: [What prevents them from buying]

Constraints: [Tone requirements, length limits, etc.]

This is for a landing page. Each copywriter should produce a complete page.

What You Get:

- 5 complete landing pages (4 copywriters + synthesis)
 - Critical evaluation of each
 - Revised versions after feedback
 - Judge's winner prediction with reasoning
 - Learning briefs for understanding what worked
-

The Complete Landing Page Structure

Regardless of which copywriter you use, a landing page needs:

1. The Hook/Headline

/[copywriter]-headlines

2. The Opening/Lead

/[copywriter]-leads

3. The Body (Story, Proof, Mechanism)

/[copywriter]-body

4. The Bullets/Benefits

/[copywriter]-bullets

5. The Offer

/[copywriter]-offers

6. The Close

/[copywriter]-closes

Mix-and-Match Approach

Sometimes the best landing page combines multiple masters:

"Stop and Build" Formula

Best for: Jaded audiences who need belief building

Step 1: /carlton-hooks

Create an attention-grabbing headline

Step 2: /evaldo-leads

Build belief gradually in the opening

Step 3: /evaldo-body

Continue belief building with mechanism

Step 4: /clayton-proof

Add overwhelming evidence

Step 5: /clayton-closes

Drive urgent action

"Sophisticated Punch" Formula

Best for: Educated audiences who distrust marketing

Step 1: /deutsch-headlines

Sophisticated, non-salesy headline

Step 2: /deutsch-leads

Trust-building story opening

Step 3: /clayton-proof

Proof cascade (made elegant)

Step 4: /deutsch-close

Future-fork emotional close

"VSL Power" Formula

Best for: Video sales letter landing pages

Step 1: /evaldo (full workflow)

10 Questions VSL structure

Step 2: /carlton-hooks

Add pattern interrupts throughout

Step 3: /clayton-bullets

Intensify the bullet sections

Landing Page Brief Template

Use this template when requesting any landing page:

PRODUCT/SERVICE:

[Name and description]

PRICE POINT:

[\$Amount]

TARGET MARKET:

- Who they are:
- What they've tried before:
- Why those things failed:
- What they believe now:

- What they secretly want:

THE PROMISE:

[What transformation they'll experience]

THE MECHANISM:

[Why/how this works when other things didn't]

AVAILABLE PROOF:

- Testimonials:
- Case studies:
- Statistics:
- Credentials:
- Expert endorsements:

KEY OBJECTIONS:

1. [Objection]
2. [Objection]
3. [Objection]

CONSTRAINTS:

- Tone: [e.g., sophisticated, urgent, friendly]
- Length: [if limited]
- Design: [if specific format needed]

CALL TO ACTION:

[What you want them to do]

After the Landing Page

Once you have your landing page:

1. Run it through the relevant critic

/[copywriter]-critic

Evaluate this landing page against the methodology

2. Test headlines separately

/arena headline-test 1

3. Check for holes

- Does it address all major objections?
- Is there enough proof for the claims?
- Is the CTA crystal clear?

Quick Reference: Copywriter Selection

Your Situation	Best Approach
Not sure what works	/arena landing-page 1
Health/finance product	/clayton
B2B/consulting offer	/deutsch
Info product/course	/evaldo
Need to stand out	/carlton
High-ticket (\$2K+)	/deutsch
Quick purchase (<\$100)	/carlton or /evaldo

Every landing page is a persuasion system. Build it with the right architecture.

Workflow: Email Sequences

Build Campaigns That Convert

When to Use This Workflow

Use this workflow when you need to:

- Create a launch email sequence
 - Write a nurture/welcome sequence
 - Build a promotional campaign
 - Write traffic-driving emails for a VSL
-

Primary Email Skill: Clayton Email

Clayton's email system is the most comprehensive in the Arsenal:

/clayton-email

BRIEF:

Campaign type: [Launch / Nurture / Promo / Evergreen]

Product: [What you're selling]

Sequence length: [Number of emails]

Audience: [Who they are]

Key promise: [What they get]

Urgency factors: [Deadlines, bonuses, etc.]

Clayton Email Framework Coverage

Email Type	Frameworks Available
Subject Lines	12 frameworks
Opening Hooks	8 frameworks
Story Emails	6 frameworks
Proof Emails	5 frameworks
Urgency Emails	7 frameworks
Campaign Architecture	Full launch sequences

Secondary Email Skill: Evaldo Lifts

For emails that drive traffic to VSLs:

/evaldo-lifts

BRIEF:

VSL topic: [What the VSL is about]

VSL angle: [The hook/promise]

Email purpose: [Drive cold traffic / Re-engage / Support launch]

Number of emails: [How many]

The DICK Method

Evaldo's lift note framework:

- **D**rama - Open with drama/intrigue
- **I**ntrigue - Build curiosity
- **C**uriosity - Create open loops
- **K**iller close - Drive to VSL

Complete Email Sequence Templates

Launch Sequence (7-Day)

/clayton-email

Create a 7-day launch sequence:

Day -3: Announcement / Coming soon

Day -2: Story / Why this exists

Day -1: Proof / Who it's worked for

Day 0: Open cart

Day 1: Deep dive on offer

Day 2: Objection handling

Day 3: Deadline / Last chance

Product: [Details]

Price: \$[Amount]

Deadline: [Real deadline]

Bonus structure: [If any]

Nurture Sequence (5-Email)

/clayton-email

Create a 5-email welcome/nurture sequence:

Email 1: Welcome + immediate value

Email 2: Story + credibility

Email 3: Teaching + soft pitch

Email 4: Case study + proof

Email 5: Offer + clear CTA

Audience: [Who just opted in]

Lead magnet they got: [What they downloaded]

Next offer: [What you're warming them toward]

VSL Traffic Sequence

/evaldo-lifts

Create 3 lift emails to drive traffic to this VSL:

VSL headline: [The VSL headline]

VSL mechanism: [What the VSL reveals]

Target: [Cold list / Warm list / Re-engagement]

Each email should create irresistible curiosity without revealing the mechanism.

Email-by-Email Approach

If you want to craft individual emails with maximum care:

Subject Line Generation

/clayton-email

Generate 20 subject lines for an email about:

[Topic]

Target open rate goal: [e.g., 25%+]

Audience: [Description]

Email purpose: [What action you want]

Single Email Writing

/clayton-email

Write a single [type] email:

Purpose: [What this email needs to accomplish]

Context: [Where it fits in the sequence]

Previous email: [What they received before]

Next email: [What's coming next]

Desired action: [Click / Reply / Buy]

Email Sequence Architecture

The Launch Pattern

1. Intrigue (Coming Soon)
2. Story (Why This Exists)
3. Proof (Who It's Worked For)
4. Open (The Offer Revealed)
5. Deep Dive (Features → Benefits)
6. Objections (Handle Resistance)
7. Urgency (Deadline Pressure)

The Evergreen Pattern

1. Value First (Pure teaching)
2. Story Bridge (Connect to offer)

3. Soft Pitch (Low pressure CTA)
4. Proof Stack (Build belief)
5. Direct Offer (Clear ask)

The Re-Engagement Pattern

1. Pattern Interrupt (Unexpected subject)
2. Acknowledgment (Address silence)
3. New Angle (Fresh perspective)
4. Value Bomb (Immediate usefulness)
5. Simple CTA (Easy next step)

Email Optimization

Subject Line Testing

/arena subject-line-test 1

Test these subject lines for this email:

[List current subject line options]

Email content summary: [What the email says]

Audience: [Who they are]

Current open rate: [If known]

Opening Hook Improvement

/clayton-email

Current opening: "[First 2 sentences]"

Rewrite this opening 5 ways to increase read-through rate.

Email Copywriter Selection Guide

Email Type	Best Copywriter	Why
Launch sequence	Clayton	Emotional triggers + urgency
VSL traffic	Evaldo	Curiosity mechanics
B2B sequence	Deutsch	Sophistication + trust
Re-engagement	Carlton	Pattern interrupts
Cart abandonment	Clayton	Urgency + objections
Welcome series	Clayton	Architecture strength

Email Brief Template

EMAIL CAMPAIGN BRIEF

Campaign Type:

- ☐ Launch
- ☐ Nurture/Welcome
- ☐ Promotional
- ☐ Re-engagement
- ☐ VSL Traffic

Product Being Sold:

[Name and description]

Price Point:

[\$Amount]

Audience:

- Who they are:
- What they already know:
- Where they came from (lead source):

Sequence Length:

[Number of emails]

Key Dates:

- Send date(s):
- Deadline (if any):

Available Assets:

- Testimonials:
- Case studies:
- Bonuses:

Tone/Voice:

[Urgent / Friendly / Professional / Edgy]

Goal Metrics:

- Target open rate:
 - Target click rate:
 - Target conversion:
-

Great email sequences don't just inform. They build desire over time until purchase becomes inevitable.

Your ZenithPro Outputs

Turning Strategic Intelligence Into Copy

The ZenithPro Advantage

You've done the strategic work other marketers skip. You have:

- **Desire Hierarchy mapping** (what they really want)
- **Psychographic Excavation** (how they think)
- **Avatar Deep Structures** (who they really are)
- **Failure Pattern Forensics** (why past attempts failed)
- **Core Concept Architecture** (the belief shift needed)

This is gold for copywriting. Here's how to feed it to your Copy Arsenal.

Using Your Outputs as Copywriting Fuel

Desire Hierarchy → Emotional Triggers

Your L1-L4 desire mapping tells Clayton exactly which emotions to target:

/clayton-psychology

Here's my audience's desire hierarchy:

L1 (Core): [From your mapping]

L2: [From your mapping]

L3: [From your mapping]

L4: [From your mapping]

Which of the 29 emotional triggers should I prioritize for this audience?

Psychographic Excavation → Voice Matching

Your excavation reveals how they think and talk:

/carlton-voice

Here's what I know about how my audience thinks:

[Paste relevant psychographic insights]

Help me match their internal voice in my copy.

What language patterns should I use?

Avatar Deep Structures → Story Selection

Your avatar work reveals which stories will resonate:

/deutsch-leads

Here's my avatar's deep structure:

Beliefs: [From your output]

Past failures: [From your output]

Secret desires: [From your output]

Self-image: [From your output]

What type of story opening would create immediate identification?

Failure Pattern Forensics → Objection Handling

Your failure analysis tells you exactly what objections to address:

/evaldo-close

Here's why my audience's past attempts failed:

[List from your forensics]

Each of these is now an objection I need to overcome.

Write the objection-handling section that addresses each failure pattern.

Core Concept → Belief Architecture

Your Core Concept IS the One Belief Evaldo talks about:

/evaldo

My Core Concept is:

[Your Core Concept statement]

This belief shift makes purchase inevitable because:

[Your reasoning]

Build a VSL that establishes this one belief.

The Complete Integration Workflow

Step 1: Load Your Strategic Intelligence

Before running any copywriter, provide context:

STRATEGIC CONTEXT (from ZenithPro work):

AUDIENCE DESIRES:

L1: [Core desire]

L2-L4: [Derived desires]

PSYCHOGRAPHICS:

- How they see themselves:

- What they've tried:

- Why it failed:

- What they believe now:

CORE CONCEPT:

[The belief shift needed]

POINT A → POINT B:

- Point A (current state): [Where they are]

- Point B (purchase state): [Where they need to be]

- Bridge: [What gets them there]

Step 2: Choose Your Approach

Based on your avatar, select the right copywriter:

Your Avatar Is...	Use This
Skeptical, burned before	/evaldo

Your Avatar Is...	Use This
Emotional, in pain	/clayton
Sophisticated, educated	/deutsch
Jaded, seen everything	/carlton
Mixed or unclear	/arena

Step 3: Run the Competition (Recommended)

For important copy, let them all compete with your strategic intelligence:

/arena [copy-type] 1

STRATEGIC CONTEXT:
[Paste your full strategic context from Step 1]

COPY NEEDED:
[What you need - landing page, VSL, email, etc.]

CONSTRAINTS:
[Any limitations - length, tone, etc.]

Quick Reference: Output → Skill

ZenithPro Output	Feed It To
Desire Hierarchy	/clayton-psychology, /evaldo
Psychographic Excavation	/carlton-voice, /deutsch-voice
Avatar Deep Structures	/deutsch-leads, story selection

ZenithPro Output	Feed It To
Failure Pattern Forensics	/evaldo-close, objection handling
Core Concept	/evaldo (One Belief structure)
Point A/B Analysis	/deutsch-leads (dual journey)

Example: Full Integration

Your Strategic Work:

Avatar: "The Frustrated Expert"

- Core desire (L1): Significance, mastery
- They believe: "I'm great at what I do but terrible at marketing"
- They've tried: Courses, agencies, tactics
- Why it failed: Applied tactics without strategy
- Core Concept: "Marketing isn't about tactics—it's about engineering demand through belief architecture"

Feeding to Copy Arsenal:

/arena landing-page 3

STRATEGIC CONTEXT:

TARGET: The Frustrated Expert

- Experts earning \$5K-50K/month
- Exceptional at delivery, struggling with demand generation
- Tried: Online courses, marketing agencies, social media tactics
- All failed because: Applied tactics without understanding strategy
- Now believe: "I must be bad at marketing" or "Marketing is sleazy"

CORE DESIRE: Significance, mastery (L1)

- Want to be recognized for expertise
- Want predictable client flow without feeling salesy

CORE CONCEPT:

"Marketing isn't about tactics—it's about engineering demand through belief architecture. You're not bad at marketing—you've been using the wrong mental model entirely."

POINT A → POINT B:

A: Believes marketing is a necessary evil, feels inauthentic

B: Sees marketing as extension of expertise, feels aligned

PRODUCT: [Your offer]

PRICE: \$[Amount]

Create a landing page that moves them from Point A to Point B.

The Multiplier Effect

Your strategic intelligence MULTIPLIES the effectiveness of every copywriter:

Without ZenithPro Context	With ZenithPro Context
Generic audience assumptions	Precise desire mapping
Surface-level objections	Deep failure pattern insights
Generic promises	Core Concept alignment
Hope-based targeting	Belief architecture precision

The copywriters become more effective because they're working with strategic intelligence, not guessing.

Pro Tips

1. Always Include Point A → Point B

The copywriters work better when they understand the belief journey:

POINT A: [Current beliefs/state]

POINT B: [Required beliefs for purchase]

2. Name the Enemy (If Identified)

If your strategic work identified an enemy positioning:

THE ENEMY: [What or who represents the failed past approach]

3. Include Proof Inventory

List what you have available:

AVAILABLE PROOF:

- Testimonials: [Y/N, how many]
- Case studies: [Y/N, topics]
- Credentials: [List]
- Statistics: [List]

4. Share the Sophistication Level

From your psychographic work:

MARKET SOPHISTICATION:

[1-5, with 5 being "seen everything"]

Strategic intelligence + world-class copywriting frameworks = copy that converts because it's built on truth.

Troubleshooting

Common Issues and Solutions

Installation Issues

"Permission denied" during installation

Mac:

```
chmod +x install.sh  
./install.sh
```

Windows (PowerShell):

```
Set-ExecutionPolicy -Scope CurrentUser -ExecutionPolicy RemoteSigned  
.\install.ps1
```

"Directory already exists" warning

This is normal if you're reinstalling. The installer will:

- Backup existing skills to `~/.claude/skills-backup-[date]/`
- Backup existing agents to `~/.claude/agents-backup-[date]/`
- Install fresh copies

Installer completes but skills don't work

1. Restart Claude Code CLI

```
exit
```

Then relaunch Claude Code.

2. Verify installation:

```
ls ~/.claude/skills/  
ls ~/.claude/agents/
```

You should see all 51 skill folders and 9 agent folders.

3. Check skill format:

Each skill folder should contain a `.md` file. If empty, re-run installer.

Skill Not Found Errors

"Skill not found: /clayton"

1. Check the skill exists:

```
ls ~/.claude/skills/clayton/
```

2. Verify the skill file:

```
cat ~/.claude/skills/clayton/clayton.md | head -20
```

3. Re-run installer if missing

"Unknown command" when using /skill-name

Skills require Claude Code CLI. They won't work in:

- Standard Claude.ai chat

- ChatGPT
- Other AI interfaces

Solution: Use Claude Code CLI for all skill commands.

Arena Issues

"Arena folder not found"

The arena folder should be at `~/.claude/arena/`

To fix:

```
mkdir -p ~/.claude/arena/win-records
```

Then copy templates from your package:

```
cp -r /path/to/ZenithPro-Copy-Arsenal-v1.0/arena-templates/* ~/.claude/arena/
```

Arena runs but doesn't save results

Check the output path in `~/.claude/arena/config.md`:

```
## Output Location  
ARENA_OUTPUT_PATH=~/Documents/Arena-Output/
```

Make sure this directory exists:

```
mkdir -p ~/Documents/Arena-Output/
```

Critic agents not found

Verify agents are installed:

```
ls ~/.claude/agents/
```

Should see:

- clayton-critic/
 - carlton-critic/
 - deutsch-critic/
 - evaldo-critic/
 - synthesis-critic/
 - marketplace-judge/
 - arena-synthesist/
 - skill-evolver/
 - copywriter-spawner/
-

Performance Issues

Skills running slowly

Large skill files (1000+ lines) can take a moment to load. This is normal.

Tips:

- Use element skills for quick tasks (e.g., `/clayton-headlines` instead of `/clayton`)
- Full orchestrators like `/clayton` load all 514 frameworks

Context limit warnings

If Claude Code warns about context limits:

1. Break into smaller requests

Instead of: "Write a full sales page"

Do: "Write the headline" → "Write the lead" → "Write the body"

2. Use element skills

Element skills have smaller context footprints.

Output Quality Issues

Copy doesn't match the methodology

Solution: Be more specific in your brief.

Bad:

Write a headline for my product.

Good:

/clayton-headlines

Product: [Specific details]

Audience: [Who they are, what they believe]

Key emotion: [What should they feel]

Constraints: [Length, tone, etc.]

Copy feels generic

Solution: Add more context from your ZenithPro work.

Include:

- Desire hierarchy (L1-L4)
- Psychographic insights

- Failure patterns
- Core Concept

The copywriters perform dramatically better with strategic context.

Arena keeps choosing the same winner

Each copywriter has different strengths. If one keeps winning:

1. Check if the brief favors a style

- VSL briefs favor Evaldo
- Emotional briefs favor Clayton
- Sophisticated briefs favor Deutsch
- Attention-grabbing briefs favor Carlton

2. The system is learning correctly

Over time, patterns emerge. This is by design.

File/Path Issues

Skills installed in wrong location

Skills must be in `~/ .claude /skills/` (note the dot in `.claude`)

Common mistake: Installing to `~/claude/skills/` (no dot)

Fix:

```
# Check current location
```

```
ls ~/ .claude /skills/
```

```
# If skills are in wrong place
```

```
mv ~/claude/skills/* ~/ .claude /skills/
```

Windows path issues

Windows users: The installer creates:

```
C:\Users\[YourName]\.claude\skills\  
C:\Users\[YourName]\.claude\agents\
```

If Claude Code can't find skills, verify this path exists.

Getting Help

1. Check the documentation first

All 15 guides in the `/docs/` folder cover common questions.

2. Re-run the installer

Many issues resolve with a fresh installation.

3. Verify your Claude Code version

Make sure you're running a recent version of Claude Code CLI.

4. Contact support

For issues not covered here, reach out through the ZenithPro community.

Quick Diagnostic Checklist

Run through this if something's not working:

- ☐ Claude Code CLI is running (not web chat)
- ☐ Skills exist in `~/.claude/skills/`
- ☐ Agents exist in `~/.claude/agents/`

- ☐ Arena folder exists in `~/.claude/arena/`
 - ☐ Skill files contain content (not empty)
 - ☐ Using correct skill names (case-sensitive)
 - ☐ Providing adequate brief information
-

Most issues resolve with a reinstall. When in doubt, run the installer again.

Voice Patterns Reference

How Each Master Sounds—And When to Use Each Voice

Why Voice Matters

The same message delivered in different voices produces dramatically different results. Each copywriter has a distinctive voice developed over decades of testing.

Match voice to audience. Mismatch kills conversions.

Clayton Makepeace Voice

The Sound

- **Intensity:** High emotional charge
- **Directness:** Says exactly what he means
- **Authority:** Speaks from proven expertise
- **Urgency:** Everything matters NOW

Voice Characteristics

- ✓ Bold statements
- ✓ Confrontational when needed
- ✓ Proof-heavy assertions
- ✓ Emotional crescendos
- ✓ Strong imperatives

Example

"Listen to me carefully, because what I'm about to share could be the difference between struggling for another five years and finally breaking through to the income you deserve.

I've seen too many smart, talented people stay broke because they believed the lies the gurus told them. That ends today."

Best For

- Health/supplement markets
- Financial services
- High-emotion purchases
- Audiences in pain or fear
- Products requiring conviction

Use When

- ☐ Audience is emotional, not analytical
 - ☐ Product solves urgent problem
 - ☐ Strong proof is available
 - ☐ Competition is weak/generic
 - ☐ Need to overcome skepticism with evidence
-

John Carlton Voice

The Sound

- **Conversational:** Like talking to a smart friend at a bar
- **Irreverent:** Breaks rules intentionally
- **Surprising:** Says the unexpected
- **Story-driven:** Everything's a narrative

Voice Characteristics

- ✓ Casual, conversational tone
- ✓ Pattern interrupts
- ✓ Self-deprecating humor
- ✓ "A-Brain" triggers (primitive/visceral)
- ✓ Unexpected word choices

Example

"Look, I know you've probably read a hundred of these things. And 99 of them were pure garbage written by some kid who's never actually sold anything.

So let me just tell you a quick story about a one-legged golfer I met in a bar in Reno. Yeah, I know how that sounds. Stick with me."

Best For

- Golf/sports markets
- Self-improvement
- Markets tired of "marketing speak"
- Products needing differentiation

- Audiences who value authenticity

Use When

- ☐ Audience is jaded, seen everything
 - ☐ Need to stand out from competitors
 - ☐ Product has an interesting story
 - ☐ Market responds to personality
 - ☐ Want memorability over formality
-

David Deutsch Voice

The Sound

- **Sophisticated:** Elevated but accessible
- **Thoughtful:** Takes time to build the case
- **Story-woven:** Narrative carries the logic
- **Trusted advisor:** Guidance, not selling

Voice Characteristics

- ✓ Elegant sentence structure
- ✓ Parallel construction
- ✓ Story-logic flow
- ✓ Empathy before assertion
- ✓ "Show don't tell" approach

Example

"There's a moment in every successful person's journey—you may have experienced it yourself—when something shifts.

Not a dramatic epiphany. More like a quiet recognition. You realize that everything you thought you knew about [topic] was slightly, but crucially, off.

And in that recognition, everything changes."

Best For

- B2B/professional services
- Sophisticated/educated audiences
- High-ticket offers
- Consulting/coaching
- Products requiring trust

Use When

- ☐ Audience distrusts "marketing"
 - ☐ Buyers are educated/sophisticated
 - ☐ Decision has career/business implications
 - ☐ Need to build trust first
 - ☐ Product is premium/high-ticket
-

Evaldo Albuquerque Voice

The Sound

- **Methodical:** Builds belief brick by brick
- **Curious:** Opens loops, creates questions
- **Conversational:** Feels like explanation, not selling
- **Patient:** Takes time to establish each point

Voice Characteristics

- ✓ Question-based structure
- ✓ Open loops throughout
- ✓ Mechanism revelation
- ✓ "Discovery" framing
- ✓ One belief focus

Example

"Have you ever wondered why some people seem to succeed effortlessly while others struggle year after year?

I used to think it was luck. Or connections. Or some talent I didn't have.

But then I discovered something that changed everything. A simple mechanism that explains why 97% of people fail—and how the other 3% quietly win."

Best For

- Video Sales Letters
- Skeptical audiences
- Info products
- Health/wealth niches
- Products with a mechanism to explain

Use When

- ☐ Audience is skeptical/burned before
- ☐ Need to build belief gradually
- ☐ Product has a "secret" or mechanism

- ☐ VSL is the format
- ☐ Price requires belief-building first

Voice Selection Matrix

Audience Type	Primary Voice	Why
In pain/desperate	Clayton	Emotional intensity matches their state
Jaded/cynical	Carlton	Pattern interrupts break through
Sophisticated/educated	Deutsch	Respects their intelligence
Skeptical/burned	Evaldo	Gradual belief building works
Action-oriented	Clayton	Direct call to action
Story-lovers	Deutsch or Carlton	Narrative strength
Analysis-paralysis	Clayton	Forces decision

Mixing Voices (Advanced)

Sometimes the best approach blends voices:

Carlton Opening → Evaldo Body

- Hook them with a pattern interrupt
- Then build belief methodically

Deutsch Opening → Clayton Close

- Build trust with sophistication

- Then drive action with intensity

Evaldo Structure → Clayton Proof

- Use belief-building architecture
 - Supercharge with proof cascades
-

Voice Diagnostic Questions

Ask yourself:

- 1. How does my audience talk to themselves?**
→ Match that internal voice
 - 2. What have they heard before?**
→ Distinguish from what they're tired of
 - 3. What's their sophistication level?**
→ Don't talk up or down to them
 - 4. What state are they in emotionally?**
→ Match the energy they need
 - 5. What's the relationship we're building?**
→ Authority vs. peer vs. advisor
-

Quick Voice Commands

To write in Clayton's voice:

/clayton-voice

[Your content]

Rewrite in Clayton's emotional, proof-heavy voice.

To write in Carlton's voice:

/carlton-voice

[Your content]

Rewrite in Carlton's conversational, irreverent voice.

To write in Deutsch's voice:

/deutsch-voice

[Your content]

Rewrite in Deutsch's sophisticated, story-driven voice.

To diagnose which voice to use:

Audience: [Description]

Product: [What you're selling]

Current copy: [Sample]

Which copywriter's voice would work best for this audience?

Voice is the invisible persuader. The right voice makes readers feel understood before you've made a single claim.

Workflow: Improve Bullets

Transform Weak Fascinations Into Irresistible Curiosity

When to Use This Workflow

Use this workflow when you:

- Have bullet points that aren't creating desire
- Need to strengthen a bullet section
- Want to test multiple bullet approaches
- Are optimizing an existing sales page

The Four Masters of Bullets

Each copywriter approaches bullets differently:

Copywriter	Bullet Philosophy	Best For
Clayton	Emotional triggers	Desire activation
Carlton	One-Two Punch specificity	Credibility + curiosity
Deutsch	Polished sophistication	Educated audiences
Evaldo	Open loops	Pure curiosity

Step 1: Diagnose Your Current Bullets

Before improving, understand what's missing:

Analyze these bullets for effectiveness:

[Paste your current bullets]

What's working?

What's missing?

Which would make someone stop and read more?

Which fall flat?

Step 2: Choose Your Bullet Approach

For Maximum Curiosity (Evaldo)

/evaldo-bullets

Here are my current bullets:

[List them]

Topic: [What you're selling]

Audience: [Who they are]

Transform these using curiosity mechanics:

- Open loops that MUST be closed
- Hints at mechanisms without revealing
- "I have to know" triggers

Evaldo Bullet Pattern:

"The strange [specific detail] that explains why [unexpected result]...
(page X)"

For Emotional Triggers (Clayton)

/clayton-bullets

Here are my current bullets:

[List them]

Audience pain points: [What they fear/desire]

Key emotions to trigger: [Fear, greed, curiosity, etc.]

Transform these to trigger emotional response.

Clayton Bullet Pattern:

"How to [specific benefit] that triggers [emotional state]—even if [obstacle they fear]"

For Specificity + Credibility (Carlton)

/carlton-bullets

Here are my current bullets:

[List them]

Product mechanism: [What makes it work]

Specific details available: [Numbers, stories, facts]

Transform using One-Two Punch methodology:

- First punch: Specific detail that creates credibility
- Second punch: Benefit that creates desire

Carlton One-Two Punch Pattern:

"The 23-minute ritual a bankrupt accountant from Toledo used to [specific result]—and why it works even if [objection]"

For Sophisticated Audiences (Deutsch)

/deutsch-bullets

Here are my current bullets:

[List them]

Audience sophistication level: [High]

What they've seen before: [Types of marketing]

Polish these for sophisticated readers who hate "marketing speak."

Deutsch Bullet Pattern:

"Why [counterintuitive insight] often matters more than [expected factor]—and how to use this to [specific outcome]"

Step 3: Run the Competition (For Important Copy)

/arena bullet-test 1

BRIEF:

Product: [What you're selling]

Audience: [Who they are]

Current bullets:

[List them]

Each copywriter should transform these bullets using their methodology.

Judge should evaluate which set would generate more desire to read the full copy.

Bullet Diagnostic Checklist

Before finalizing, verify each bullet:

Curiosity Check:

- ☐ Creates an open loop
- ☐ Makes them NEED to know more
- ☐ Doesn't reveal the answer

Specificity Check:

- ☐ Contains specific details (numbers, names, places)
- ☐ Feels real, not generic
- ☐ Has credibility markers

Benefit Check:

- ☐ Clear "what's in it for me"
- ☐ Connects to their desires
- ☐ Promises transformation

Uniqueness Check:

- ☐ Couldn't be said about competitors
- ☐ Sounds fresh, not clichéd
- ☐ Has an unexpected element

Example Transformations

Original (Weak):

| "Learn how to write better copy"

After Evaldo (Curiosity):

"The counter-intuitive 'backwards writing' method that makes sales copy write itself... even if you've never written a word of marketing in your life"

After Clayton (Emotional):

"How to write copy that reaches into your prospect's chest and squeezes their heart—until buying is the only relief they can imagine"

After Carlton (Specificity):

"What a 67-year-old retired shoe salesman in Akron discovered about writing copy after failing for 11 years... and why it works when nothing else does"

After Deutsch (Sophistication):

"Why the copy that 'sounds like copy' almost always fails—and the elegant principle that separates amateur persuasion from professional influence"

Bullet Section Architecture

Strong bullet sections follow patterns:

The Crescendo Pattern

Start mild, build intensity:

- Informational bullet
- Benefit bullet
- Emotional bullet
- "Can't live without" bullet

The Variety Pattern

Mix different trigger types:

- Curiosity bullet (open loop)
- Proof bullet (specific result)
- Fear bullet (what to avoid)
- Hope bullet (future vision)

The Proof-Stacking Pattern

Build credibility through specifics:

- Specific number result
- Named person testimonial
- Unusual detail that proves depth
- Unexpected benefit

Quick Bullet Improvement Commands

Add curiosity:

/evaldo-bullets

Make this bullet more curiosity-driven: "[bullet]"

Add emotion:

/clayton-bullets

Make this bullet trigger stronger emotional response: "[bullet]"

Add specificity:

/carlton-bullets

Add One-Two Punch specificity to: "[bullet]"

Add sophistication:

/deutsch-bullets

Polish this for sophisticated readers: "[bullet]"

How Many Bullets?

Copy Type	Typical Count	Notes
Landing page	7-15	Key benefits only
Sales letter	15-30	More comprehensive
VSL	12-20	Need to be speakable
Email	3-7	Shorter, punchier

Great bullets don't list features. They create hunger that only the product can satisfy.

Workflow: VSL Creation

Build Video Sales Letters That Convert

When to Use This Workflow

Use this workflow when you:

- Need to create a new VSL from scratch
- Want to restructure an underperforming VSL
- Are scripting a video sales presentation
- Need supporting emails for a VSL launch

The Master of VSLs: Evaldo

Evaldo Albuquerque's methodology was BUILT for VSLs. His 10 Questions structure and One Belief formula are specifically designed for the VSL format.

Start here:

/evaldo

The Complete VSL Workflow

Step 1: Define the One Belief

Before writing a word, identify THE belief that must be established:

/evaldo

BRIEF:

Product: [What you're selling]

Audience: [Who they are]

What they currently believe: [The wrong belief]

What they need to believe: [The One Belief that makes purchase inevitable]

Help me articulate the One Belief for this VSL.

Example One Belief:

"The reason nothing has worked isn't you—it's that every solution you've tried was based on the same flawed assumption. Once you understand the REAL mechanism, everything changes."

Step 2: Build the 10 Questions Structure

Evaldo's VSL architecture follows 10 key questions the viewer subconsciously asks:

/evaldo-leads

Using the One Belief: [Your One Belief]

Create the VSL structure answering these 10 questions:

1. Why should I listen to you?
2. What's in it for me?
3. How do I know this is real?
4. Why is this different?
5. How does it work?
6. Will this work for me?
7. What do I get?
8. Is it worth the price?
9. What if it doesn't work?
10. Why should I act now?

Audience: [Who they are]

Product: [What you're selling]

Price: \$[Amount]

Step 3: Write the Opening (First 5 Minutes)

The opening must hook and create massive curiosity:

/evaldo-leads

Write the first 5 minutes of this VSL:

One Belief: [Your One Belief]

Hook angle: [The surprising/curious element]

Audience pain: [What they're struggling with]

The opening must:

- Stop them from clicking away
- Create an open loop they MUST close
- Establish credibility without bragging
- Promise something they haven't heard before

Step 4: Build the Body (Belief Building)

The body systematically builds belief:

/evaldo-body

Continue the VSL body:

One Belief to establish: [Your One Belief]

Mechanism to reveal: [How the product works]

Proof available: [Testimonials, stats, credentials]

Build belief gradually:

- Story that demonstrates the mechanism
- Proof that validates the story
- Explanation that creates understanding
- Additional proof layers

Step 5: Craft the Close

The close handles objections and drives action:

/evaldo-close

Write the VSL close:

Offer: [What they get]

Price: \$[Amount]

Guarantee: [Your guarantee]

Bonuses: [List bonuses]

Urgency: [Why act now]

Handle these objections:

- [Objection 1]
- [Objection 2]
- [Objection 3]

Use price anchoring and stacking.

Adding Power from Other Masters

Evaldo owns VSL structure, but you can enhance with:

Carlton Hooks (Pattern Interrupts)

VSLs need pattern interrupts to maintain attention:

/carlton-hooks

This VSL needs attention resets at these points:

- After the opening hook (3 min mark)
- Before the mechanism reveal (8 min mark)
- Before the close (15 min mark)

Create pattern interrupts that re-engage viewers who might be drifting.

Clayton Emotional Beats

Add emotional intensity at key moments:

/clayton-psychology

At these moments in the VSL, I need to amplify emotion:

- The "rock bottom" moment in the story
- The "discovery" moment
- The "what if you don't act" moment

What emotional triggers should I use at each point?

Deutsch Story Integration

For more sophisticated VSLs:

/deutsch-leads

Make this VSL opening more story-driven
while maintaining Evaldo's structure:

[Your current opening]

Add dual journey (logic + emotion) elements.

The Hybrid VSL Formula

Best-in-class VSLs often combine:

Evaldo Structure (foundation)

- └─ Carlton Hook (opening pattern interrupt)
- └─ Evaldo Lead (curiosity/One Belief setup)
- └─ Deutsch Story (credibility narrative)
- └─ Evaldo Mechanism (belief building)
- └─ Clayton Proof (proof cascade)
- └─ Carlton Interrupt (re-engagement)
- └─ Evaldo Close (price anchoring)
- └─ Clayton Urgency (final push)

VSL Supporting Emails

Every VSL needs traffic. Use Evaldo's lift framework:

/evaldo-lifts

Create 5 emails to drive traffic to this VSL:

VSL headline: [Your VSL headline]

VSL hook: [The main curiosity angle]

VSL mechanism: [What it reveals]

Email 1: Cold traffic introduction

Email 2: Story angle

Email 3: Proof angle

Email 4: Urgency/deadline

Email 5: Last chance

VSL Brief Template

Use this when requesting a full VSL:

VSL BRIEF

PRODUCT:

Name: [Product name]

What it does: [Core function]

Mechanism: [How it works]

PRICE:

[\$Amount]

Payment options: [If any]

AUDIENCE:

Who they are: [Demographics]

What they've tried: [Past failures]

Why it failed: [The flawed assumption]

What they believe now: [Current wrong belief]

ONE BELIEF:

[The belief that makes purchase inevitable]

PROOF AVAILABLE:

- Testimonials: [Y/N, count]
- Case studies: [Y/N, topics]
- Statistics: [List]
- Credentials: [Your authority]

OFFER STACK:

- Main product: [What they get]
- Bonus 1: [Description]
- Bonus 2: [Description]
- Bonus 3: [Description]

GUARANTEE:

[Your risk reversal]

URGENCY:

[Why act now - deadline, limited spots, etc.]

LENGTH TARGET:

[Minutes - typically 15-45 for VSLs]

VSL Length Guidelines

Price Point	Typical Length	Notes
\$27-\$97	15-25 min	Quick belief building
\$97-\$497	25-35 min	More proof needed
\$497-\$997	35-45 min	Full mechanism reveal

Price Point	Typical Length	Notes
\$997+	45-60 min	Comprehensive objection handling

Running VSL in the Arena

For important VSLs, let them compete:

/arena vsl-script 2

[Full VSL brief from template above]

Each copywriter should produce a complete VSL script.

Multiple rounds allow for iteration and improvement.

*The best VSLs don't feel like sales pitches. They feel like discoveries.
Evaldo's structure creates that feeling systematically.*

Workflow: Add Proof

Transform Claims Into Undeniable Evidence

When to Use This Workflow

Use this workflow when you:

- Have claims that lack supporting proof
- Need to strengthen a weak proof section
- Want to build a proof cascade

- Are countering skepticism in your market

The Master of Proof: Clayton

Clayton Makepeace's 13 proof strategies are legendary for overcoming skepticism. His proof cascades have generated billions in sales.

Start here:

/clayton-proof

Clayton's 13 Proof Strategies

Strategy	What It Is	Impact Level
Testimonials	Customer success stories	High
Case Studies	Detailed transformation narratives	Very High
Statistics	Numbers and data	Medium
Expert Endorsements	Third-party authority	High
Demonstrations	Show it working	Very High
Credentials	Your qualifications	Medium
Media Mentions	Third-party validation	High
Scientific Studies	Research backing	High
Before/After	Visual transformation	Very High
Reason Why	Explains WHY it works	Medium
Comparisons	Better than alternatives	Medium

Strategy	What It Is	Impact Level
Guarantees	Risk reversal as proof	High
Social Proof	Numbers of users/buyers	Medium

Step 1: Audit Your Current Proof

First, assess what you have and what's missing:

/clayton-proof

Here are the claims in my copy:

[List your main claims]

Here's the proof I currently have:

[List current proof elements]

What types of proof am I missing?

What would make these claims undeniable?

Step 2: Gather Your Proof Assets

Create an inventory:

PROOF INVENTORY:

Testimonials:

- [] Written testimonials
- [] Video testimonials

- [] Audio testimonials
- [] Screenshots of results

Case Studies:

- [] Full transformation stories
- [] Specific result metrics
- [] Timeline of results

Statistics:

- [] Your own data
- [] Industry statistics
- [] Research studies

Expert Endorsements:

- [] Industry expert quotes
- [] Celebrity/influencer support
- [] Professional associations

Credentials:

- [] Your experience
- [] Your results
- [] Your certifications

Media:

- [] Press mentions
- [] Podcast appearances
- [] Publication features

Step 3: Build the Proof Cascade

Clayton's genius: Don't use ONE proof element. Stack them:

/clayton-proof

Build a proof cascade for this claim:

"[Your main claim]"

Available proof assets:

[List from your inventory]

Create a proof cascade that:

1. Opens with the strongest single proof
2. Stacks additional proof types
3. Addresses the "yeah, but..." voice
4. Ends with undeniable conclusion

The Proof Cascade Structure

LAYER 1: The Opening Salvo

"Don't take my word for it..."

[Strongest testimonial or case study]

LAYER 2: The Stack

"And that's not an isolated case..."

[Additional testimonials/results]

LAYER 3: The Authority

"Even [expert/media] has recognized..."

[Expert endorsements, media mentions]

LAYER 4: The Data

"The numbers tell the story..."

[Statistics, research, your own data]

LAYER 5: The Reason Why

"Here's WHY this works..."

[Mechanism explanation]

LAYER 6: The Undeniable

"So the only question is..."

[Transition to offer]

Making Proof More Powerful

Specificity Amplification

Weak proof:

| "Many customers have seen great results."

Strong proof (Clayton method):

| "2,847 customers in 23 countries have used this exact system. Average improvement: 47% in the first 30 days. 67% report results within the first week."

/clayton-proof

Make this proof more specific and credible:

"[Your current proof]"

Add specific numbers, names, timeframes, and details.

Proof Stacking

Instead of one testimonial, use three with different angles:

/clayton-proof

I have these testimonials:

[List them]

Stack them for maximum impact:

- Which leads? (most impressive result)
- Which validates skeptics? (similar to reader)
- Which handles objections? (addresses "yeah but...")

The "Even Better" Bridge

Connect proof elements with escalation:

"And if you think that's impressive, listen to what happened to [next person]..."

Proof by Audience Type

For Skeptical Audiences

/clayton-proof

This audience has been burned before. They don't trust claims.

Build proof that:

- Acknowledges their skepticism
- Uses "show don't tell"

- Provides verifiable evidence
- Lets results speak

For Sophisticated Audiences

/clayton-proof

This audience is B2B/educated. They want data.

Build proof that:

- Leads with logic, not emotion
- Uses statistics and research
- Includes expert validation
- Avoids "marketing speak"

For Emotional Audiences

/clayton-proof

This audience is in pain. They need hope.

Build proof that:

- Leads with transformation stories
- Shows people like them succeeding
- Emphasizes the feeling of relief
- Makes success feel achievable

Quick Proof Enhancement Commands

Strengthen a testimonial:

/clayton-proof

Make this testimonial more powerful: "[testimonial]"

Add specificity, emotion, and credibility.

Build a case study:

/clayton-proof

Turn this success story into a compelling case study:

[Basic story facts]

Include: situation, struggle, discovery, transformation, specific results.

Create proof for a claim:

/clayton-proof

I claim: "[your claim]"

I have: [available evidence]

Build proof that makes this claim undeniable.

Stack social proof:

/clayton-proof

I have [X] customers, [Y] testimonials, [Z] results.

Stack this social proof for maximum impact.

The Ultimate Proof Test

Before finalizing, ask:

1. **Would a skeptic believe this?**

If not, add more specific evidence.

2. **Can this be verified?**

If possible, make it verifiable.

3. **Does it address their "yeah, but..."?**

Pre-handle the objection within the proof.

4. **Does it build on itself?**

Each proof element should amplify the previous.

5. **Is there a "reason why"?**

Explain WHY the results happen.

Running Proof Through the Arena

For critical proof sections:

/arena proof-section 1

BRIEF:

Main claim: "[Your claim]"

Available proof: [Full inventory]

Audience: [Who they are and their skepticism level]

Current proof section: [If you have one to improve]

Each copywriter should build their strongest proof case.

Claims without proof are just opinions. Claims with Clayton's proof cascade become conclusions your reader reaches themselves.
