

Chain of Beliefs Prompt System - Methodology Map v2.0

Enhanced with Sphere of Influence (SOI) Integration

For Framework Integration Analysis

This document captures the methodological architecture of each prompt so you can identify enhancement opportunities when reviewing belief-shifting frameworks

SYSTEM OVERVIEW

The Tool Sequence v2.0:

CORE INTEGRATION: SPHERE OF INFLUENCE (SOI) FRAMEWORK

The Four SOI Enhancement Layers Applied to All Prompts:

1. S.U.C. SCORING (Quality Standard)

Every element must score 7+ on all three dimensions:

- **Strong (1-10):** Does this make a powerful, specific promise?
- **Unique (1-10):** Is this different from everything else?
- **Compelling (1-10):** Does it create must-know curiosity?

🔍 Framework Integration Points:

- Alternative messaging quality frameworks?
- Different scoring/evaluation methodologies?
- Quality threshold calibration methods?

2. INVISIBLE INFLUENCE (5-Layer Design)

90% of influence happens below conscious awareness:

Layer	%	Function
SURFACE	10%	What they consciously experience
CONTEXT	25%	Environmental framing that shapes interpretation

Layer	%	Function
IDENTITY	30%	Who they become by accepting
BELIEF	25%	Actual belief being installed
DESIRE	15%	Existing desire being channeled toward solution

Framework Integration Points:

- Alternative persuasion layer models?
- Subconscious influence frameworks?
- Identity transformation methodologies?
- Desire channeling approaches?

3. M.W.A. FRAMEWORK (Motivation/Willingness/Ability)

Diagnose and address the primary weakness:

Element	Assessment	If Low, Address By...
Motivation	How urgent is their pain? (1-10)	Front-load pain amplification, cost of inaction
Willingness	How ready to change? (1-10)	Front-load capability proof, "people like you"
Ability	Can they act? (1-10)	Front-load ROI, risk reversal, investment justification

Framework Integration Points:

- Alternative readiness assessment frameworks?
- Behavior change models (Fogg, etc.)?
- Resistance diagnosis methodologies?

4. TENSION DESIGN (70/30 Teach/Withhold)

- **TEACH (70%):** Complete insight given - real value delivered
- **WITHHOLD (30%):** Strategic gap that creates hunger for more
- **Questions planted:** Curiosity hooks that pull forward

- **Strategic incompleteness:** They know WHAT and WHY, but need your HOW

Framework Integration Points:

- Open loop methodologies?
 - Curiosity gap frameworks?
 - Engagement sustaining techniques?
-

PROMPT 1: BELIEF PATH MAPPER v2.0

Purpose: Map ALL possible pathways from current beliefs to Core Concept acceptance with invisible influence architecture

What This Creates: Multiple paths with S.U.C.-scored bridges, invisible influence layers, micro-commitment sequences, and M.W.A. calibration

PHASE 1: BELIEF EXTRACTION

Categorizes beliefs from avatar document into 7 types + NEW Desire Architecture:

1. **Identity Beliefs** - "I am [type of person]"
2. **Capability Beliefs** - "I can/can't do X"
3. **Causation Beliefs** - "Success comes from X"
4. **World/Market Beliefs** - "The market works like..."
5. **Solution Beliefs** - "I need more/better X"
6. **Blame/Attribution Beliefs** - "It's because of X"
7. **Impossibility Beliefs** - "That won't work for me"

NEW - 1.8 Desire Architecture:

For each belief, also identify:

- What DESIRE does this belief protect or serve?
- What IDENTITY does holding this belief maintain?
- What PAIN does this belief help them avoid?

Framework Integration Points:

- Other belief categorization systems?
- Desire-belief connection frameworks?

- Belief protection mechanisms?
-

PHASE 2: CORE CONCEPT DECONSTRUCTION (Enhanced)

Analyzes the Core Concept to identify:

- **Embedded Claims** (explicit, implicit, negation)
- **Required Prerequisites** (what must already be believed)
- **Blocking Beliefs** (what would make them reject it)
- **Identity Implications** (who they become if they accept it)

NEW - 2.5 S.U.C. Analysis:

- Strong (1-10): Does it make a powerful, specific promise?
- Unique (1-10): Is this angle different from everything else?
- Compelling (1-10): Does it create must-know curiosity?
- If any <7: Provide alternative Core Concept angles that score higher

NEW - 2.6 Polarization Potential:

- Who is this Core Concept FOR? (Specific tribe)
- Who is this Core Concept explicitly NOT FOR? (Repel group)
- What velvet rope does acceptance create?
- What tribal identity does acceptance signal?

Framework Integration Points:

- Alternative S.U.C.-style evaluation frameworks?
 - Polarization/positioning methodologies?
 - Tribal identity frameworks?
-

PHASE 3: GAP ANALYSIS (Enhanced)

For each belief, assesses:

- Does it block the Core Concept?
- Does it support the Core Concept?

- Must it shift?
- Shift difficulty (1-10)
- **NEW: Desire Protected** - What want does this belief serve?
- **NEW: Identity Threatened** - What identity is at risk?

NEW - 3.1 M.W.A. Diagnostic:

Element	Level	Evidence	Bridge Implication
Motivation	1-10	[What indicates this]	[How to address]
Willingness	1-10	[What indicates this]	[How to address]
Ability	1-10	[What indicates this]	[How to address]

Primary Weakness: All paths must address the weakest element FIRST

 Framework Integration Points:

- M.W.A. alternative models?
- Readiness assessment frameworks?
- Resistance measurement methodologies?

PHASE 4: PATH MAPPING (Enhanced)

Each path now includes comprehensive specifications per bridge:

STANDARD ANALYSIS:

- Gap size from previous belief (1-10)
- Evidence required to cross gap
- Primary installation vehicle (Story/Data/Logic/Demonstration)

NEW - INVISIBLE INFLUENCE DESIGN per Bridge:

Layer	Design
-----	-----
SURFACE (10%)	What they consciously experience
CONTEXT (25%)	Environmental framing that shapes interpretation
IDENTITY (30%)	Who they become by accepting this
BELIEF (25%)	The actual belief being installed
DESIRE (15%)	Existing desire being channeled toward solution

NEW - S.U.C. SCORE per Bridge:

- Strong: __/10
- Unique: __/10
- Compelling: __/10
- If any <7, provide revised bridge angle

NEW - MICRO-COMMITMENT DESIGN per Bridge:

- What small agreement precedes this belief?
- What identity statement does accepting imply?
- "By agreeing to this, they're saying 'I am someone who...'"
- Psychological momentum score (cumulative across path)

NEW - CONTEXT PREREQUISITES per Bridge:

- Environmental frame required (where/when encounter this?)
- Narrative frame required (what story contains this?)
- Social frame required (who else believes this?)
- Authority frame required (why trust this source?)
- What would BREAK the frame and kill the belief?

NEW - INSTALLATION VEHICLE EXPANSION:

Original: Story, Data, Logic, Demonstration

Added: Environment, Micro-commitment, Polarization, Authority

NEW - TENSION DESIGN per Bridge:

- TEACH (70%): What complete insight do we give?
- WITHHOLD (30%): What creates hunger for more?
- Questions created that pull toward next bridge
- Strategic incompleteness that maintains forward motion

NEW - EXPERIENTIAL PROOF OPTIONS per Bridge:

- Quick win: What result in <5 minutes proves this?
- Demonstration: What could they DO that proves this?
- Result-before-belief: How see it work before accepting?

NEW - POLARIZATION ELEMENTS (for identity-level bridges):

- Who is this bridge FOR?
- Who is this bridge explicitly NOT FOR?
- Tribal signal sent by accepting
- Does this belief have enemies? (Required: Yes for identity bridges)

NEW - POINT OF NO RETURN per Path:

- Which bridge, once crossed, makes stopping feel inconsistent?
- Identity lock-in statement at this point

🔍 Framework Integration Points:

- Additional invisible influence layer models?
- Micro-commitment frameworks (Cialdini)?
- Context/frame engineering methodologies?
- Polarization/tribal frameworks?
- Point of No Return design methods?

PHASE 5: PATH CATEGORIES (Enhanced)

Existing categories plus:

NEW - 5.6 By M.W.A. Focus:

- **Motivation Paths:** Front-load pain amplification, cost of inaction
- **Willingness Paths:** Front-load possibility, capability, "people like you"
- **Ability Paths:** Front-load ROI, investment justification, risk reversal

NEW - 5.7 By Installation Style:

- **Argument Paths:** Primarily logical/evidential
- **Experience Paths:** Primarily demonstration/quick-win
- **Environment Paths:** Primarily contextual/frame-based
- **Identity Paths:** Primarily tribal/polarization-based

PHASE 6: STRATEGIC ANALYSIS (Enhanced)

Adds:

NEW - 6.6 Multi-Entry Architecture (Presell World Design):

Different POPs encounter beliefs at different starting points:

Entry Source	Starting Position	Skip These	Reinforce These	Full Install
Cold Traffic	[position]	[bridges]	[bridges]	[bridges]
Warm Referral	[position]	[bridges]	[bridges]	[bridges]
Content Binge	[position]	[bridges]	[bridges]	[bridges]
Problem-Aware	[position]	[bridges]	[bridges]	[bridges]
Solution-Aware	[position]	[bridges]	[bridges]	[bridges]

CONVERGENCE POINT: All paths must converge at [Specific bridge before Core Concept]

 Framework Integration Points:

- Customer journey mapping frameworks?
- Traffic temperature methodologies?
- Awareness level frameworks (Schwartz)?

NEW PHASES 9-10:

PHASE 9: QUICK WIN CATALOG

For each major belief shift:

Belief Shift	Quick Win Option	Time to Result	Proof Strength	Implementation
-----	-----	-----	-----	-----

PHASE 10: POLARIZATION MAP

Belief	Tribal IN-Group	Tribal OUT-Group	Velvet Rope Statement	Enemy Belief
-----	-----	-----	-----	-----

PROMPT 2: BELIEF GAP ANALYZER v2.0

Purpose: Map from Core Concept acceptance TO Purchase (assumes Path Mapper already used)

Key Difference from v1: Starts AFTER Core Concept is believed, focuses on conversion architecture with invisible influence design

THE HANDOFF FROM PATH MAPPER

- Path Mapper builds the WHAT (understanding) → Core Concept acceptance
- Gap Analyzer builds the WHO (you as solution) → Purchase readiness

GAP TYPES SPECIFIC TO v2.0

1. **Solution Fit** - "Does THIS specific solution work?"
2. **Capability** - "Can someone like ME do this?"
3. **Investment** - "Is THIS price worth it?"
4. **Timing** - "Why act NOW vs. later?"
5. **Guide** - "Why YOU vs. alternatives?"
6. **Risk** - "Is this safe to try?"

INVISIBLE INFLUENCE CONVERSION ARCHITECTURE

Surface Narrative: What they think is happening
"[Learning about the offer, evaluating if it's right]"

Actual Transformation: What's really happening
"[Beliefs being installed that make purchase feel inevitable and self-generated]"

The Invisible Conversion:

They think: "I'm evaluating this offer objectively"

Actually: "I'm being guided through a belief sequence"

They feel: "I decided this was right for me"

Reality: "The architecture led me to this conclusion"

Result: "This feels like MY decision, not being sold"

MICRO-COMMITMENT CONVERSION LADDER

Stage	Commitment	Size	Identity Implication	Cumulative
Post-CC Entry	"[First small yes]"	2	"I'm interested"	2
Solution Fit	"[This fits me]"	3	"This could work"	5
Capability	"[I can do this]"	4	"I'm capable"	9
Value	"[This is worth it]"	4	"I invest in solutions"	13

Stage	Commitment	Size	Identity Implication	Cumulative
Guide	"[You're the right guide]"	3	"I trust this source"	16
Timing	"[Now is the time]"	5	"I act decisively"	21
PONR	"[I'm ready to invest]"	10	"I'm committed"	31
Risk Cleared	"[This is safe]"	3	"I'm protected"	34
Purchase	"[Buy/Apply]"	10	"I'm doing this"	44

POINT OF NO RETURN DESIGN

Location: After Bridge #[X]

What they've agreed to: [Cumulative commitments]

Why they can't go back: [Cognitive dissonance explanation]

Identity Lock-In Statement: "By this point, they've said 'I am someone who [X]'. NOT buying would contradict who they've agreed they are."

Framework Integration Points:

- Conversion sequence frameworks?
- Commitment consistency research (Cialdini)?
- Purchase decision architecture?
- Risk reversal methodologies?

FORMAT-SPECIFIC BLUEPRINTS

SALES PAGE FORMAT:

- Section structure with invisible influence per section
- Micro-commitment capture via scroll depth
- PONR placement
- Tension arc through page

WEBINAR FORMAT (60-90 min):

- Time allocation per bridge
- Micro-commitment schedule (polls, chat)
- PONR moment (minute [X])
- Tension management throughout

EMAIL SEQUENCE FORMAT:

- Email count and coverage
- Subject line S.U.C. requirements
- PONR email identification
- Cliffhanger design between emails

 Framework Integration Points:

- Sales page architecture frameworks?
- Webinar conversion methodologies?
- Email sequence optimization?

PROMPT 3: STRATEGIC BLUEPRINT GENERATOR v4.0

(Formerly Belief Bridge Generator v3)

Purpose: Create format-agnostic STRATEGIC BLUEPRINT for installing belief sequences with full invisible influence architecture

Key Difference from Earlier Versions: Master blueprint approach with complete SOI integration

BRIDGE-BY-BRIDGE INSTALLATION ARCHITECTURE

For each bridge, the blueprint includes:

1. BELIEF SHIFT SPECIFICATION

- FROM → TO transformation
- S.U.C. Score (7+ required or revised)
- Transformation type (Identity/Causation/World/Solution/Blame/Impossibility)

2. INVISIBLE INFLUENCE DESIGN

Layer	Design	Detection Risk
-----	-----	-----
SURFACE (10%)	"[Conscious experience]"	[H/M/L]
CONTEXT (25%)	"[Frame shaping interpretation]"	
IDENTITY (30%)	"[Who they become]"	
BELIEF (25%)	"[Actual belief installed]"	
DESIRE (15%)	"[Want being channeled]"	

3. INSTALLATION REQUIREMENTS

- Installation Difficulty: Cognitive Load + Emotional Difficulty
- Time/Space Requirements (minimal/standard/thorough)
- Installation Success Criteria
- Installation Failure Signs

4. MICRO-COMMITMENT ARCHITECTURE

- Pre-bridge commitment
- In-bridge commitments
- Identity implications
- Cumulative momentum score
- Distance to PONR

5. TENSION DESIGN

- TEACH (70%): Complete insight given
- WITHHOLD (30%): Gap that creates hunger
- Questions planted
- Strategic incompleteness

6. QUICK WIN OPTIONS

- Type (exercise/thought experiment/real-time test)
- Time required
- Expected discovery
- Proof of bridge belief

7. POLARIZATION DESIGN (if identity-level)

- WHO THIS IS FOR
- WHO THIS IS NOT FOR
- Tribal signal sent
- Enemy belief referenced

8. M.W.A. VARIATIONS

- If Low-M: [Adjustment]
- If Low-W: [Adjustment]
- If Low-A: [Adjustment]

9. CONTENT ASSET INVENTORY

For each bridge, inventory of:

- Story options (with S.U.C. scores)
- Data options (with S.U.C. scores)
- Logic options (with S.U.C. scores)
- Demonstration options (with S.U.C. scores)
- Authority options (with S.U.C. scores)
- Polarization assets (with S.U.C. scores)

10. OBJECTION ARCHITECTURE

- Primary objection + invisible influence response
- Secondary objections + responses
- Pre-emptive vs. reactive handling

11. TRANSITION ARCHITECTURE

- Question this bridge answers
- Question this bridge creates
- Tension transition design
- Natural transition mechanisms

Framework Integration Points:

- Content asset matching frameworks?
- Objection handling methodologies?
- Transition engineering?

FORMAT ADAPTATION MATRICES

WEBINAR:

- Time allocation per bridge
- Slide requirements
- Interaction/micro-commitment moments
- Critical notes for invisible installation in live delivery

3-DAY CHALLENGE:

- Day assignment per bridge

- Daily quick wins
- Community/tribal elements
- PONR placement (typically Day 2)

EMAIL SEQUENCE:

- Email count and coverage
- Subject line S.U.C. requirements
- Click/reply commitment design
- Cliffhanger design

SALES PAGE:

- Section structure
- Scroll-based commitment progression
- Proof placement
- Mobile vs. desktop considerations

VIDEO SERIES:

- Episode structure per bridge
- Hook design (S.U.C. optimized)
- Cliffhanger design
- Comment engagement for commitment capture

PODCAST:

- Audio-only adaptations
- Story emphasis (format favors narrative)
- Pacing for listening
- Action driving from passive medium

Framework Integration Points:

- Format-specific optimization frameworks?
- Platform-specific conversion methodologies?
- Multi-format integration approaches?

INSTALLATION DIFFICULTY REFERENCE TABLE (Enhanced)

Belief Type	Difficulty	Time	Best Vehicles	S.U.C. Priority	Polarization?
Identity	HIGH	Extended	Story + Polarization	High-C	YES
Capability	MEDIUM	Standard	Demo + Logic	High-S	Optional
Causation	MEDIUM	Standard	Logic + Data	High-U	No
World/Market	HIGH	Extended	Data + Authority	High-S	Optional
Solution	LOW	Brief	Logic + Demo	High-C	No
Blame/Attribution	MEDIUM	Standard	Story + Reframe	High-U	Optional
Impossibility	HIGH	Extended	Demo + Story	High-S	YES

PROMPT 4: CONTENT ECOSYSTEM ARCHITECTURE v2.0

(Formerly Belief to Content Ecosystem)

Purpose: Transform Path Mapper output into distributed content for social/video platforms with invisible influence design

Key Enhancement: Every piece of content designed for invisible belief installation

EPIPHANY UNITS (Enhanced)

Clusters of 2-4 related beliefs creating single moment of insight, now with full SOI specs:

For each Epiphany Unit:

S.U.C. SCORE:

- Strong: __/10
- Unique: __/10
- Compelling: __/10
- If any <7, REVISED ANGLE: "[Score 7+ version]"

INVISIBLE INFLUENCE DESIGN:

| Layer | Design |

|-----|-----|
| SURFACE (10%) | "[Apparent topic/value]" |
| CONTEXT (25%) | "[Frame setup]" |
| IDENTITY (30%) | "[Who they become]" |
| BELIEF (25%) | "[Real shift happening]" |
| DESIRE (15%) | "[Want being redirected]" |
| Detection Risk | HIGH/MEDIUM/LOW |

TENSION DESIGN:

- TEACH (70%): "[Complete insight given]"
- WITHHOLD (30%): "[Gap that creates hunger]"
- Questions planted: "[Curiosity hooks]"
- Hunger created for: "[What they now want]"

POLARIZATION ELEMENTS:

- This epiphany is FOR: "[Specific tribe]"
- This epiphany is NOT FOR: "[Repel group]"
- Tribal signal: "[What accepting says about them]"
- Does this have enemies? YES/NO (Required: YES for identity-level)

MICRO-COMMITMENT SEQUENCE:

- Pre-epiphany small yes: "[Agreement that opens them]"
- Identity implication: "By accepting, they're saying 'I am someone who...'"
- Momentum contribution: +[X]

CONTEXT PREREQUISITES:

- Environmental frame required
- Narrative frame required
- Social frame required
- Authority frame required
- What would BREAK the frame

EXPERIENTIAL PROOF OPTION:

- Quick win (<5 min)
- Demonstration option
- Result-before-belief option

M.W.A. FOCUS:

- If Low-M: [Adjustment]
- If Low-W: [Adjustment]
- If Low-A: [Adjustment]

 Framework Integration Points:

- Epiphany creation frameworks?
- Insight design methodologies?
- "Aha moment" engineering?

LONG-FORM PILLAR ARCHITECTURE (Enhanced)

Each pillar (25-45 min) now includes:

S.U.C. SCORE FOR PILLAR PREMISE:

- Strong: __/10
- Unique: __/10
- Compelling: __/10

M.W.A. FOCUS: This pillar primarily serves [Low-M / Low-W / Low-A] audiences

INVISIBLE INFLUENCE ARC:

- Surface narrative (what they think they're watching)
- Actual belief installation sequence
- Identity transformation by end
- Point of No Return: [Timestamp] with explanation

MICRO-COMMITMENT LADDER:

Timestamp	Commitment	Method
[X:XX]	"[Agreement]"	[Poll/Chat/Verbal]
[X:XX]	**PONR**	[Method]

CONTEXT FRAME ESTABLISHMENT:

- Opening frame (first 2 min)
- Authority establishment
- Tribal signal (who this is for/not for)

TENSION DESIGN SUMMARY:

- Total TEACH moments: [X]%
- Total WITHHOLD elements: [Y]%
- Questions planted throughout
- Hunger created for: "[What they need next]"

CLIP MOMENTS (all S.U.C. scored):

Timestamp	Clip Title	S.U.C.	Hook Style	Installation Vehicle
[X:XX-Y:YY]	"[Title]"	S:/U:/C:___	[Type]	[Vehicle]

🔍 Framework Integration Points:

- Long-form content structure frameworks?
- Point of No Return placement methodologies?
- Clip extraction optimization?

CLIP INVENTORY (Enhanced)

Each clip now includes:

INVISIBLE INFLUENCE SPECS:

- Surface (what they think they're watching)
- Belief being installed
- Identity implication
- Desire channeled
- Detection risk
- Polarization element
- Micro-commitment requested
- Tension design (Teach X% / Creates hunger for Y)

Hook Styles (S.U.C. optimized):

- Pattern interrupt (challenges assumption) - Best for: High-S clips
- Validation (you're not alone/wrong) - Best for: Low-W audiences
- Framework reveal (new way to see it) - Best for: High-U clips
- Provocative claim (controversial) - Best for: Polarization clips
- Question hook (makes them think) - Best for: Micro-commitment openers
- Relatability hook (describes situation) - Best for: Low-M audiences
- Promise hook (what they'll get) - Best for: High-C clips
- Story hook (narrative opening) - Best for: Identity installation
- Challenge hook (dares reconsider) - Best for: Low-W audiences

 Framework Integration Points:

- Hook/attention frameworks?
- Scroll-stopping methodologies?
- Thumbnail/title optimization?

PLATFORM DISTRIBUTION (Enhanced)

Platform Roles + M.W.A. Mapping:

Platform	Primary Role	M.W.A. Focus	Best Content	Frequency
YouTube (Long)	Depth + Full Shifts	All (complete journey)	Pillars	1/week
YouTube Shorts	Discovery → Long	Low-M (pain hooks)	Clips	5-7/week
Instagram Reels	Discovery	Low-M (visual pain)	Clips (visual)	5-7/week
Instagram Feed	Bridge	Low-W (possibility)	Carousels, quotes	3-4/week
TikTok	Discovery + Testing	Low-M (aggressive)	Clips (pattern interrupt)	5-7/week
LinkedIn Video	B2B Discovery	Low-A (ROI focus)	Clips (professional)	3-5/week
LinkedIn Feed	Bridge + Conversion	Low-W (capability)	Narrative posts	5-7/week
Email	Bridge + Conversion	Low-A (investment)	Narrative	2-3/week

MULTI-ENTRY ARCHITECTURE (Presell World Design):

Entry Source	Starting Awareness	Skip	Reinforce	Full Install
Cold Short-Form	Problem-unaware	None	-	All Gateway
Warm Short-Form	Problem-aware	Some Gateway	Gateway	Bridge
Long-Form Direct	Solution-curious	Gateway	Bridge	Dependent + Core
Referral	Trusted source	Gateway + some Bridge	Bridge	Core Concept

CONVERGENCE POINT: All paths must converge at [Specific unit before Core]

 Framework Integration Points:

- Platform-specific algorithm frameworks?
- Multi-platform content strategy?
- Convergence funnel methodologies?

TESTING & AMPLIFICATION (Enhanced)

INVISIBLE INFLUENCE INDICATORS:

- Save rate (highest signal - want to return)
- Share rate (want others to experience shift)
- Comment quality (belief-shift language):
 - "I never thought of it that way" = belief shifted
 - "This is exactly what I needed" = identity resonance
 - "Tagging [person]" = tribal spread
 - "Where do I learn more?" = tension working
 - Debate/disagreement = polarization working

S.U.C. PERFORMANCE CORRELATION:

- Track which S.U.C. scores correlate with which metrics
- Hypothesis: High-S → saves, High-U → shares, High-C → comments

PAID AMPLIFICATION ROUNDS:

1. **Boost Winners** (top 5% organic) - Build "shifted" audience
2. **Commitment Ladder Retargeting** - Drive to long-form
3. **Identity Conversion** - Direct offer to PONR-crossed audience

Framework Integration Points:

- Content testing frameworks?
 - Paid amplification methodologies?
 - Retargeting sequencing?
-

PRE-PUBLISH AUDIT CHECKLIST (New)

S.U.C. CHECK:

- ☐ Strong score 7+?
- ☐ Unique score 7+?
- ☐ Compelling score 7+?

INVISIBLE INFLUENCE CHECK:

- ☐ Surface matches platform norms?
- ☐ Context layer established before belief?
- ☐ Identity shift feels like discovery, not persuasion?
- ☐ Belief installation below conscious awareness?
- ☐ Existing desire being channeled?

TENSION CHECK:

- ☐ 70% value delivered?
- ☐ 30% strategically withheld?
- ☐ Questions planted?
- ☐ NO complete satisfaction?

MICRO-COMMITMENT CHECK:

- ☐ Small yes embedded before big claim?
- ☐ Identity implication clear?

- ☐ Builds on previous commitments?

POLARIZATION CHECK:

- ☐ Clear who this is FOR?
 - ☐ Clear who this is NOT FOR?
 - ☐ Tribal signal embedded?
 - ☐ Would someone disagree? (Required: yes)
-

PROMPT 5: BELIEF INSTALLATION ORCHESTRATOR v1.0 (NEW)

Purpose: Master synthesis engine that takes outputs from all other prompts and creates unified Invisible Influence Blueprint

What This Creates: Complete strategic architecture that optimizes the WHOLE journey, not just parts

PHASE 1: INPUT SYNTHESIS & CROSS-REFERENCE

Belief Universe Mapping:

- Extract ALL beliefs from all inputs
- Create unified inventory (no duplicates)
- Map relationships between beliefs

Gap-Path Cross-Reference:

- Which gaps does each path address?
- Which gaps have redundancy (reinforcement opportunity)?
- Which gaps are uncovered (vulnerability)?

Asset-Belief Matching:

- Which assets install which beliefs?
- Which beliefs have NO assets (proof gap)?
- Which assets serve MULTIPLE beliefs (high-leverage)?

🔍 Framework Integration Points:

- Systems thinking frameworks?
 - Integration/synthesis methodologies?
 - Gap analysis frameworks?
-

PHASE 2: M.W.A. MASTER DIAGNOSIS

Comprehensive Assessment:

- MOTIVATION baseline with evidence
- WILLINGNESS baseline with evidence
- ABILITY baseline with evidence
- Primary + Secondary weakness identification

M.W.A. Journey Requirements:

- What must happen to M across journey?
- What must happen to W across journey?
- What must happen to A across journey?
- Where each needs to peak

Segment Variations:

- Segment A: M: **W**: A:___ → Path + Adaptations
 - Segment B: M: **W**: A:___ → Path + Adaptations
-

PHASE 3: PATH ORCHESTRATION

Primary Path Selection: Based on gap coverage, M.W.A. alignment, asset availability, S.U.C. scores, business context

Supporting Path Integration: Which paths strengthen primary? Where converge? How work together?

Journey Architecture Design:

- Entry points (for different traffic temperatures)
- Path assignments (for different M.W.A. profiles)

- Convergence points
 - Culmination point
-

PHASE 4: INVISIBLE INFLUENCE META-ARCHITECTURE

Journey-Level Design:

- SURFACE NARRATIVE: What they think is happening across entire journey
- ACTUAL TRANSFORMATION: What's really being installed
- IDENTITY ARC: Entry → Midpoint → Exit → Post-Core identity
- DESIRE CHANNELING: How existing want redirects to your solution

Touchpoint Coordination:

- Each touchpoint's surface aligns with journey narrative
- Belief layer contributes to cumulative shift
- Identity layer builds on previous shifts
- No touchpoint breaks invisible frame

Detection Risk Management:

- Where is detection risk highest?
 - Frame recovery protocols
-

PHASE 5: COMMITMENT CONSISTENCY ORCHESTRATION

Master Commitment Ladder:

Complete sequence spanning ALL touchpoints from entry to purchase

Point of No Return Deep Design:

- Location in journey
- What they've agreed to by this point
- Why stopping feels inconsistent
- Identity statement locked

Commitment Momentum Architecture:

- Momentum building phase
 - Momentum maintenance phase
 - Momentum conversion phase
 - Recovery points if lost
-

PHASE 6: CONTEXT FRAME ORCHESTRATION

Master Frame Architecture:

- Environmental frame
- Narrative frame
- Social frame
- Authority frame

Frame Evolution Across Journey:

How each frame evolves from entry to offer

Frame Vulnerability & Recovery:

Where could frame break? Recovery protocols?

PHASE 7: TENSION ARC ORCHESTRATION

Journey Tension Architecture:

Visual representation of hunger escalation

Teach/Withhold Master Map:

By phase, what's given vs. withheld

Strategic Incompleteness Architecture:

- They HAVE: WHAT, WHY, POSSIBLE
- They NEED: HOW, SEQUENCE, SUPPORT

Hunger Escalation Design:

Entry → Evolved → Peak → Offer alignment

PHASE 8: POLARIZATION ORCHESTRATION

Tribal Identity Transformation Arc:

Entry identity → Mid-journey identity → Exit identity

Polarization Moment Mapping:

Key polarization moments across journey

Velvet Rope Progression:

Entry → Mid-journey → Core Concept → Offer velvet ropes

Enemy Architecture:

Enemy belief, why it strengthens attraction, references throughout

PHASE 9: EXPERIENTIAL PROOF ORCHESTRATION

Quick Win Sequence:

Mapped across entire journey

Result Escalation Architecture:

Small → Meaningful → Significant → Transformational

Result-Before-Belief Integration:

For high-resistance beliefs

PHASE 10: S.U.C. QUALITY ORCHESTRATION

Complete S.U.C. Inventory:

Every element audited

Revision Requirements:

Critical/Important/Nice-to-have prioritization

Framework Integration Points:

- Quality control frameworks?
- Audit methodologies?

- Prioritization frameworks?

PROMPT 6: CHARACTER EMPIRE GENERATOR v2.0

Purpose: Transform ZenithMind OS profiles into personal brand blueprints with invisible character installation

Key Enhancement: Character adoption designed as invisible self-discovery, not performed mask

Based on: Dan Kennedy's 8-Framework System + SOI Integration

SOI INTEGRATION FOR CHARACTER INSTALLATION

S.U.C. Applied to Character:

Every element (archetype, competency, parable, episode) scores 7+ or revised

Invisible Influence for Character:

Layer	Character Application
SURFACE (10%)	Apparent self-discovery journey
CONTEXT (25%)	Where/when character elements emerge
IDENTITY (30%)	Who they become by adopting
BELIEF (25%)	What they believe about themselves
DESIRE (15%)	Existing wants this fulfills

Micro-Commitment Ladder for Character Adoption:

Stage	Commitment	Identity Implication
Recognition	"This resonates"	"I see myself here"
Exploration	"I want to explore"	"I might be this"
Experimentation	"I'll try this element"	"I'm testing this identity"
Adoption	"This is working"	"I'm becoming this"
Embodiment	"This is who I am"	"I AM this character"
PONR	"I can't go back"	"This is my truth now"
Amplification	"I'm going deeper"	"I'm fully this person"

Tension Design for Character:

- TEACH (70%): Fully revealed character architecture
- WITHHOLD (30%): Creates hunger to embody more deeply

Polarization for Character:

- ATTRACTS: Who resonates
- REPELS: Who self-selects out
- VELVET ROPE: What makes character exclusive
- TRIBAL SIGNAL: What adopting says about them

M.W.A. for Character Adoption:

- Motivation: How urgently do they want this transformation?
- Willingness: How ready to show up differently?
- Ability: Can they authentically perform this character?

Quick Win for Character Proof:

- Micro-Expression Test (<5 min)
- Response Test (single post)
- Embodiment Test (one situation)

Framework Integration Points:

- Character/archetype frameworks beyond Kennedy's 6?
- Personal brand development methodologies?
- Authentic identity expression frameworks?

THE 8 CHARACTER EMPIRE FRAMEWORKS (with SOI Integration)

1. Six Character Archetypes™

- Stern Parent, Patient Teacher, Mystical Seer, Eccentric Genius, Everyman Leader, Renegade Truth-Teller
- **S.U.C. scoring** for archetype blend
- **Invisible influence design** for archetype acceptance

2. Core Competency Stack™ (5 Layers)

- Base, Deep, Performance, Unexpected, Quirk
- Each layer S.U.C. scored
- Stack integration scored as unified whole

3. Flaw Disclosure Matrix™

- Showcase (60%), Disclosure (30%), Foundation, Shadow
- **Polarization potential** of vulnerabilities identified

4. Context Creation Framework™ (5 Points)

- Enemies, Time/Circumstances, People, Places, Adventures
- Each element S.U.C. scored

5. Parable Engineering Process™ (Enhanced)

- Extract, Embellish, Enhance, Encode, Embed
- **S.U.C. scoring** for parable
- **Invisible influence design** for parable
- **Polarization elements** identified
- **Micro-commitment embedded**

6. Never-Ending Novel™

- Episodes not information
- **30-Episode Blueprint** with S.U.C. per episode

7. Daily Content Discipline™

- **Character Installation Ritual** (morning/creation/evening)

8. Legend-Building Blueprint™ (7 Stages)

- Origin Story → First Victory → Trials → Near-Death → Resurrection → Transformation → Transcendence

30-EPISEODE BLUEPRINT (Enhanced)

Each episode includes:

S.U.C. SCORE:

- Strong: __/10
- Unique: __/10
- Compelling: __/10

INVISIBLE INFLUENCE DESIGN:

- Surface: What they think they're learning
- Belief installed: What actually shifts
- Identity implication: Who they become

MICRO-COMMITMENT:

- Agreement embedded

TENSION DESIGN:

- Teaches: What's revealed
- Withholds: What creates hunger for next episode

POLARIZATION MOMENT:

- Where character attracts/repels

CLIFFHANGER:

- Hook to next episode

Episodes organized by phase:

- **Ep 1-10: Foundation Building** (Recognition Phase)
- **Ep 11-20: Depth Diving** (Exploration Phase) - PONR at Ep 20
- **Ep 21-30: Momentum Building** (Embodiment Phase)

90-DAY CHARACTER INSTALLATION PLAN

Phase 1: Days 1-30 - Recognition to Adoption

- Week 1: Recognition (M.W.A. calibrated)

- Week 2: Exploration
- Week 3: Experimentation
- Week 4: Early Adoption

Phase 2: Days 31-60 - Adoption to Embodiment

- Week 5: Deepening
- Week 6: Integration
- **Week 7: PONR Week** - Public declaration, full commitment
- Week 8: Reinforcement

Phase 3: Days 61-90 - Embodiment to Legend Building

- Week 9: Expansion
- Week 10: Systemization
- Week 11: Amplification
- Week 12: Transcendence prep

FRAMEWORK INTEGRATION CHECKLIST v2.0

When reviewing any belief-shifting framework, check against:

INVISIBLE INFLUENCE DESIGN

- ☐ Does it offer alternative layer models beyond 5-layer design?
- ☐ Does it address subconscious influence mechanisms?
- ☐ Does it have detection risk management?
- ☐ Does it address frame establishment and maintenance?

S.U.C. QUALITY ASSESSMENT

- ☐ Does it offer alternative quality scoring methods?
- ☐ Does it have threshold calibration approaches?
- ☐ Does it address revision/optimization protocols?

M.W.A. READINESS

- ☐ Does it offer alternative readiness assessment?
- ☐ Does it address behavior change barriers?

- ☐ Does it have calibration for different profiles?

MICRO-COMMITMENT ARCHITECTURE

- ☐ Does it have progressive commitment frameworks?
- ☐ Does it address identity implication design?
- ☐ Does it have PONR identification methods?

TENSION/INCOMPLETENESS

- ☐ Does it have teach/withhold ratio frameworks?
- ☐ Does it address curiosity gap design?
- ☐ Does it have hunger escalation methods?

POLARIZATION/IDENTITY

- ☐ Does it have tribal identity frameworks?
- ☐ Does it address attract/repel architecture?
- ☐ Does it have velvet rope methodologies?
- ☐ Does it address enemy belief design?

EXPERIENTIAL PROOF

- ☐ Does it have quick win design frameworks?
- ☐ Does it address result-before-belief?
- ☐ Does it have proof escalation methods?

CONTEXT/FRAME

- ☐ Does it have frame engineering frameworks?
- ☐ Does it address multi-entry architecture?
- ☐ Does it have convergence point methodologies?

BELIEF IDENTIFICATION

- ☐ Does it offer additional belief categorization beyond 7 types?
- ☐ Does it have hidden belief surfacing methods?
- ☐ Does it address belief-desire connections?

BELIEF SHIFT MECHANICS

- ☐ Does it explain HOW beliefs shift (mechanism)?
- ☐ Does it offer installation vehicles beyond 8 types?
- ☐ Does it address resistance during shift?
- ☐ Does it have sequencing principles?

PATH OPTIMIZATION

- ☐ Does it have prioritization frameworks?
- ☐ Does it address cognitive load management?
- ☐ Does it have pacing methodologies?

CONTENT CREATION

- ☐ Does it have story structure frameworks?
- ☐ Does it have hook/attention frameworks?
- ☐ Does it have format-specific optimization?

MEASUREMENT

- ☐ Does it have belief installation verification methods?
- ☐ Does it have success/failure criteria?
- ☐ Does it have testing frameworks?

QUICK REFERENCE: KEY METHODOLOGICAL COMPONENTS v2.0

Component	Currently Used	Look For Frameworks That...
Quality Standard	S.U.C. (Strong/Unique/Compelling) 7+ threshold	Offer alternative messaging quality frameworks
Influence Layers	5-layer (Surface/Context/Identity/Belief/Desire)	Offer alternative persuasion layer models
Readiness Assessment	M.W.A. (Motivation/Willingness/Ability)	Offer alternative

Component	Currently Used	Look For Frameworks That...
		behavior change frameworks
Commitment Architecture	Micro-commitment ladder with PONR	Offer progressive commitment frameworks
Tension Design	70/30 Teach/Withhold	Offer curiosity gap methodologies
Polarization	Attract/Repel/Velvet Rope/Enemy	Offer tribal identity frameworks
Belief Types	7 categories + Desire Architecture	Offer additional categorization
Installation Vehicles	8 types (Story/Data/Logic/Demo/Authority/Environment/Micro-commitment/Polarization)	Add new persuasion mechanisms
Path Metrics	Cognitive load, certainty, emotional difficulty, S.U.C., PONR	Provide alternative measurement
Multi-Entry	Presell World Design with convergence points	Address customer journey complexity
Format Adaptation	6 formats (Webinar/Challenge/Email/Sales Page/Video/Podcast)	Format-specific optimization

SYSTEM WORKFLOW SUMMARY

└ Avatar Document

└ Failure Forensic Document

└ Core Concept

Proof Asset Inventory

BELIEF PATH MAPPER v2.0

- Multiple paths identified
- S.U.C. scored bridges
- M.W.A. diagnosis
- Invisible influence layers
- Micro-commitment sequences
- Gateway/Bottleneck beliefs

STRATEGIC BLUEPRINT v4.0

- Bridge-by-bridge specs
- Full invisible influence
- Format adaptation matrices
- Quick wins per bridge
- PONR design

BELIEF GAP ANALYZER v2.0

- Core Concept → Purchase
- Conversion architecture
- Format-specific blueprints
- PONR conversion design

INSTALLATION ORCHESTRATOR v1.0

- Master synthesis
- Journey-level invisible
- Complete commitment ladder
- Full S.U.C. audit
- Unified blueprint

CONTENT ECOSYSTEM v2.0

- Epiphany Units
- Long-form Pillars w/ PONR
- Clip inventory w/ S.U.C.
- Platform distribution
- Multi-entry architecture

ZenithMind OS Scorecard

CHARACTER EMPIRE v2.0
• 8 Framework mapping
• Invisible character install
• 30-Episode blueprint
• 90-Day implementation
• S.U.C. throughout

Document Version: 2.0

Enhanced with Sphere of Influence Integration

Created for ZenithPro Lesson 06 Framework Integration Analysis
